

MP-200N

Pinpoint Saddle Stitching Machine

MP-200N

Pinpoint Saddle Stitching Machine

MP-200N

This pinpoint stitch machine is used for topstitching on the front facing of men's wear, as well as front flies, pocket mouths and trouser sides, as a cost-effective topstitching machine that offers increased productivity. In addition, its applicable working range has been widened to include various materials and other processes, such as the topstitching of collars for shirts, blouses and knits.

The MP-200N has the newly added capability of sewing wider stitches and using thicker thread. It can be used for a wider range of applications requiring narrower to wider stitch widths.

MP-200NL

Excellent seam quality

- In addition to balloon-stitching (to produce seams with a hand-stitched touch), smooth sewing of chain-off stitches, and having other outstanding seam quality features of the highly regarded Columbia 100, the MP-200N achieves more improved sewing capabilities and a wider adjustment range.
- The machine comes with a box type feed that permits a split adjustment in both horizontal and vertical directions, thereby responding to the sewing of various types of materials. Additionally, the inclination of the feed dog is also adjustable in accordance to the material.

Positioning of needles with increased accuracy

 Gauges that are determined by the combination of needles and spacers are of the Columbia type. This improves the accuracy of the installation of needle positions, which determines the seam quality.

Wider range of applicable needle gauges and yarn counts

- Needle gauges support, using replacement parts, stitch widths from as narrow as 1.2mm to as wide as 5.0mm.
- The applicable range of yarn counts has been widened from #60 to #8 (B33, Nm = 120/3) for both Tetron and spun thread. This allows the machine to be used for topstitching a wider range of items.

Model name	Needle gauge	Gauge *	Applicable yarn count
	1.2mm	Option	
MP-200NS	1.6mm	Provided as standard	Tetron, Spun #60~#30, B33~B46, Nm=120/3~60/3
(Needle gauge 1.6mm)	2.0mm	To be replaced with the needle clamp spacer supplied with the machine	
	2.5mm	Option	
MP-200NL	3.0mm	Option	Tetron, Spun
(Needle gauge	4.0mm	Option	#30~#8, B46~B92,
5.0mm)	5.0mm	Provided as standard	Nm=60/3~30/3

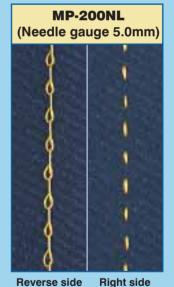

*Refer to "Replaceable parts of gauges" for a correspondence between gauges and needle gauges

is shorter than the needle gauge by approximately 0.5mm (depending on the material and sewing conditions)

- Accessory parts for S type (gauge set is not prepared)
- O Parts to be purchased (included in a gauge set) at the time of changing sizes
- ▼ Parts not to be purchased (not included in a gauge set) at the time of changing sizes since they are included in S or L type machine as accessories.

OPTIONS

● Needle bar crank *In order to be applicable to a wider range of materials, various types of needle bar cranks with different thread take-up timings have been prepared.

Part No.	Thread take-up timing	Туре	Remarks
231-21106	Standard	Standard timing (provided as standard)	_
231-21205	Standard -10°	Type timing, of which is earlier than that of the standard needle bar crank by 10°	Thread is applied with a higher tension as compared with the standard needle bar crank
231-21304	Standard +10°	Type timing, of which is later than that of the standard needle bar crank by 10°	Thread is applied with a lower tension as compared with the standard needle bar crank
231-21403	Stepless setting	A Needle bar crank which has a flat shaft to permit the stepless setting of thread take-up timing. Note, however, that the needle bar stroke changes according to the thread take-up timing.	_
