QVP sewing machines for quilting to become a series Launch of the TL-2200QVP Mini 1-needle Lockstitch sewing machine

JUKI will begin worldwide sales of the TL-2200QVP Mini 1-needle Lockstitch sewing machine specially designed for quilting on June 1.

The company has already been selling its “QVP Series” computerized sewing machines and overlockers for household use around the world since October 2015. In addition to the TL-2200QVP long-arm sewing machine for quilting, which offers original stitches for large quilts, this new product will bring a single-needle straight sewing machine into the series.

The TL-2200QVP Mini single-needle straight sewing machine was developed based on the TL-2010Q single-needle straight computerized sewing machine for quilting that is already sold around the world. The TL2200QVP Mini includes an enhanced presser for quilting as well as a design that includes the QVP logo and QVP blue accents on the body, making the machine look more like a part of the QVP series.

In particular, in addition to the guide on the presser foot—which is very useful when piecing—the upper feed presser foot ensures good fabric feeding when quilting, and a stitch ruler is also included—an essential tool for equally spaced straight line quilting. Furthermore, optional extras include a free motion table as well as a presser foot with a head that rotates through 90 degrees (with both sides open)—a highly useful addition for free motion quilting.

The inclusion of a foot switch stopper gives users the option of using the foot controller to cut the thread when free motion quilting. And with a speed control function that allows the maximum sewing speed to be adjusted from 200 to 1,500 rotations per minute, users can enjoy stable and relaxed sewing when working on consecutive lines at the same speed.

JUKI plans to continue developing new functions and parts for quilting in the future, increase the appeal of the “JUKI QVP Quilting Series”, and further expand sales.

*QVP stands for Quilt Virtuoso Pro. The machine will have the “QVP” font and a crocus flower logo to increase the continuity of the products in this series.

◆Main functions

Function	Details
① Easy-to-see needle drop	Because the diameter of the head is overwhelmingly small at about 7 mm at the top and about 4 mm at the bottom, this feature—along with the compact threading device—makes it exceptionally easy to see the needle drop. In particular, when the head is rotated 90 degrees for free motion quilting, the machine is outstandingly easy to use.
② High and large sewing space	Although the head is small, the sewing machine has a high and large sewing space for a machine of its size, with a work space height of 150 mm and a distance of 215 mm from the needle drop to the point of contact with the bed.
③ Ability to select whether to cut the thread with the foot controller	With the foot controller that starts and stops sewing and adjusts the sewing speed, you can also operate the automatic thread cutting function. Users can now select whether to use the automatic thread cutting function by using the foot switch stopper.
④ Ability to maintain a set sewing speed	The maximum sewing speed can be adjusted from 200 to 1,500 stitches per minute. In particular, by maintaining a set sewing speed when free motion quilting, users can create stable stitch designs.
⑤ Ability to adjust the bobbin thread tension	Because the machine uses a vertical full rotary hook bobbin, it can form tight, beautiful stitches. In addition, the bobbin thread tension can be adjusted via the bobbin case, so you can always set the perfect thread tension even when sewing with a wide range of threads and fabrics.
⑥ Presser foot for piecing is included	In addition to the traditional presser foot on which the right side is lower than the left, a presser foot with a guide that is useful when piecing thin fabrics is also included, making it easier to create pieces that require precise sewing.
⑦ Presser foot for free motion quilting is included	An open-type presser foot for quilting is included. In addition to increasing the visibility of the needle drop for creating intricate patterns, this foot also makes it easy to free the upper thread from

	the presser foot when starting to sew.
® Accessory for creating equally spaced straight line quilting patterns	With the included stitch ruler that can be used when the upper feed presser foot is attached, equally spaced straight line quilting becomes easy.

◆Release date

June 1th 2016

◆Specifications

	Specification
Sewing speed	55~1,500 stitches/min.
Stitch length	0~6mm
Presser Foot Lift	By Lever 7mm/By Knee Lifter 12mm
Needle	HAx1 #9~#18
Outer dimensions	Width, height, and depth: 452mm X 350mm X 219mm
Weight	11.9kg
Wide Table	Width 590 X Depth 335mm Optional free motion table to use the head is rotated 90 degrees Width 810 X Depth X 600 X Height 85mm
Sewing Light	LED
Hook	Vertical Full Rotary Hook

QVP Series Lineup

Product name	Features
DX-2000QVP household computerized sewing machine 	<p>The DX series, JUKI's top-of-the-line computerized sewing machine, has been specially designed for use in quilting.</p> <p>This model is equipped with 240 stitch patterns that can decorate quilts and stimulate the user's creativity. Using the float function, uneven seams, which often occur when sewing more than one fabric, can be prevented. In addition, the pivot function allows the user to sew with both hands on the fabric while gradually turning it. The machine includes the QVP quilting pressor foot kit (in a small box).</p> <p>External dimensions of the top (mm): W445 x H291 x D210 Weight: 10.3 kg</p>

	<p>* To be sold all over the world, excluding Japan (A slightly different model is already being sold in Japan.)</p>
<p>MO-2000QVP compact overlock sewing machine</p> 	<p>JUKI's top-of-the-line overlock sewing machine</p> <p>The easy threader makes upper and lower looper threading easy.</p> <p>When the desired stitch type is selected, the thread tension, amount of feed, and other settings best suited for that stitch type will be displayed on the LCD screen. The machine can flexibly respond to the diverse range of changes of threads and stitches required for sewing.</p> <p>External dimensions of the top (mm): W330 x H310 x D280</p> <p>Weight: 9 kg</p> <p>* To be sold all over the world, excluding Japan (A slightly different model is already being sold in Japan.)</p>
<p>TL-2200QVP household long-arm sewing machine for quilting</p>  <p>* The picture shows the product in standing mode.</p>	<p>A long-arm sewing machine for quilting with an automatic thread trimming function</p> <p>Among the sewing machines with a 45-cm-wide sewing space (more than double that of a typical household sewing machine), it has the highest sewing space on the market, at a maximum of 25 cm (the maximum height of competing products is 20 cm), which makes the quilting of large quilts easy and more beautiful.</p> <ul style="list-style-type: none"> • Available in two different styles: standing (for moving the top part)/sitting (for moving the fabric) • First-ever long-arm sewing machine with an automatic thread trimming function <p>This machine will be released in the Japanese market following launch in the U.S. and is to be sold all over the world from October 2015.</p> <p>External dimensions of the top (mm): W222 x H460 x D730</p> <p>Weight: 26 kg</p> <p>* To be sold all over the world</p>
