## Business Report

(January 1, 2014 to December 31, 2014)

### 1. Overview of the JUKI Group (the “Group”)

#### (1) Business Progress and Results

In the fiscal year 2014 (FY2014), although sales were generally weak for the Sewing Machinery Business and Electronic Assembly Systems Business in China, consolidated net sales for FY2014 were 107,581 million yen (up by 14.0% from the same period of the previous fiscal year), as a result of a firm performance for the Sewing Machinery Business in Asia’s emerging markets, continuing on from the previous fiscal year, and the effect of yen depreciation. In addition, boosted by the sales increase along with the positive effects from the group-wide structural reforms that have been implemented since the previous fiscal year, consolidated operating income was 8,217 million yen (up by 59.5% from the same period of the previous fiscal year), consolidated ordinary income was 7,710 million yen (up by 98.8% from the same period of the previous fiscal year), and consolidated net income was 6,058 million yen, (up by 101.5% from the same period of the previous fiscal year).

JUKI AUTOMATION SYSTEMS CORPORATION, a consolidated subsidiary of the Company, succeeded to the surface-mount technology (“SMT”) equipment and related businesses of Sony Corporation and its subsidiary Sony EMCS Corporation through company split (absorption-type company split) on March 1, 2014. As a result, we are continuing not only to improve development efficiency and enhance product lineup, but also to strengthen solution sales through utilizing both companies’ mounting technology knowhow, while reconstructing the JUKI Group’s Electronic Assembly Systems Business in the areas of development, sales and production.

Furthermore, the Company implemented a capital increase of approximately 4,200 million yen through exercises of subscription rights to shares from July through August 2014 in order to realize the construction of a “solid business foundation” capable of continuing to generate earnings sustainably even into the future. This enabled the Company to further strengthen its capital base and improve its financial position as steps toward a new growth strategy.

Business results by major segment are as follows:

##### 1) Sewing Machinery Business

In the apparel sewing industry, there is a growing trend of a shift in clothing production bases from China into emerging Asian regions. Sales in these regions proceeded firmly and there was an increase in sales to manufacturers of non-apparel sewn products such as car seats and sports shoes, an expanding business field that the Company is focusing on. As a result, consolidated net sales of the Sewing Machinery Business as a whole were 77,991 million yen (up by 13.3% from the same period of the previous fiscal year).

##### 2) Electronic Assembly Systems Business (SMT systems, inspection equipment, printing equipment and others)

In addition to the contribution to sales from new products and from purchased products associated with business field expansion, there was an increase in the sales of labor-saving systems. As a result consolidated net sales of the Electronic Assembly Systems Business as a whole were 22,432 million yen (up by 19.2% from the same period of the previous fiscal year).

#### (2) Capital Investments

Capital investment totaling 1,964 million yen was disbursed in FY 2014, including 643 million yen for machinery, equipment and vehicles and 585 million yen for tools, furniture and fixtures.

#### (3) Financing

Accompanying the exercise of the first series subscription rights to shares with exercise price amendment clause that were issued through a third party allotment on July 4, 2014, the Company procured funds of 4,188 million yen.

**(4) Status of Succession of the Rights and Obligations in Connection with the Business of the Other Company, etc. through Absorption-type Merger or Absorption-type Company Split**

On March 1, 2014, the Company's consolidated subsidiary JUKI AUTOMATION SYSTEMS CORPORATION succeeded to the SMT equipment and related businesses of Sony Corporation and its subsidiary, Sony EMCS Corporation through company split (absorption-type company split).

**(5) Issues to Address**

Holding the vision of a "Global 'Monodzukuri' manufacturer equipped to survive in the 21st century," the Company formulated the Medium-Term Management Plan (FY2016), which contains the following three basic policies.

1) Constructing a business structure capable of continuously yielding profits

Under this policy, we will create a strong customer base by winning new customers, and expand areas of business that deliver high rates of return.

2) Developing powerful personnel with the expertise to implement our strategy

Under this policy, we will prioritize assigning personnel to business fields in which we are aiming for growth, utilizing female employees and re-employed experienced personnel more fully, and recruiting of mid-career personnel possessing expertise and foreign employees positively.

3) Constructing a smart business foundation

Under this policy, we will implement operational reforms at the level of all companies including group companies, and work to create a productive business structure with no waste. We will proceed with these operational reforms by using four approaches: i) reform of cost structure, ii) reform of organization and roles, iii) reconstruction of information systems, and iv) reconstruction of administrative and indirect functions.

To achieve the goals of the Medium-Term Management Plan, the Company will take the following actions in each of its businesses.

(Sewing Machinery Business)

- In the Sewing Machinery Business, our vision is to become the business with the top market share in all sectors and regions. To this end, we will construct an FA (Factory Automation) business through the full-fledged operation of line solutions.
- We will continue to expand the non-apparel and spare parts businesses.
- In addition to South-East Asia and South Asia, we will strengthen sales operations in regions including Latin America and Africa.

(Electronic Assembly Systems Business)

- In the Electronic Assembly Systems Business, we aim to construct a business model incorporating the remarkable strength of our operational capability in line solutions.
- In order to win new customers using our high-value-added proposal capabilities, we will expand our ability to address automation needs using purchased products in addition to our labor-saving equipment, which we developed in-house.
- We will swiftly improve the profitability by accomplishing business structural reforms.

(Group Business)

- In the Group Business, through cooperation among group companies, we aim to construct a "Monodzukuri" corporate group of manufacturers that is strong in the areas of precision processing technology and assembly. In this way, we will bolster the capabilities of all companies in terms of both production equipment and personnel, strengthen our ability to respond to orders, and accelerate our acquisition of new customers.

Positioning this Medium-Term Management Plan as two years in which we will create the foundations to ensure growth, the Company will increase investment in growth for the future. We will strive to realize a virtuous cycle of growth and to improve our business performance by carrying out advance development and capital investment and pushing ahead with investment for the development and utilization of personnel. In this way, we are aiming to be a company that responds to change and forms a strong business.

We will address these issues through the concerted efforts of the Group, in order to meet the expectations from our shareholders. We, kindly, ask our shareholders for their further support and encouragement.

## Notes to Consolidated Financial Statements

### 1. Notes on the Basis for the Preparation of Consolidated Financial Statements, etc.

#### (1) Scope of consolidation

- 1) Number of consolidated subsidiaries: 31  
Names of principal consolidated subsidiaries:  
JUKI AUTOMATION SYSTEMS CORPORATION, JUKI DENSHI KOGYO CORPORATION,  
JUKI SINGAPORE PTE. LTD., JUKI (SHANGHAI) INDUSTRIAL CO., LTD., JUKI (CHINA) CO.,  
LTD., and 26 other subsidiaries.
- 2) Names of major non-consolidated subsidiaries:  
Six non-consolidated subsidiaries, including SHOWA JUKI CO., LTD., are excluded from the scope of consolidation because their exclusion does not preclude reasonable judgment on the Group's financial situation and management results as a whole.

#### (2) Application of equity-method

The six non-consolidated subsidiaries and NISSEN Co., Ltd. and four other associates are excluded from application of equity-method because their exclusion does not preclude reasonable judgment on the Group's financial situation and management results as a whole.

#### (3) Accounting periods of consolidated subsidiaries

The year-end balance sheet dates for all consolidated subsidiaries, other than JUKI INDIA PVT. LTD. whose balance sheet date is March 31, are the same as the consolidated balance sheet date. The financial statements of JUKI INDIA PVT. LTD. prepared on the basis of a provisional closing of accounts as of the consolidated balance sheet date are used in preparing the consolidated financial statements.

#### (4) Accounting standards

- 1) Standards and methods for valuation of important assets
- A. Securities
- Available-for-sale securities with market quotations  
Stated based on the market price, etc. on the consolidated balance sheet date  
(Unrealized gains and losses are excluded from income and reported in a separate component of net assets. The cost of sales is calculated using the moving-average method.)
- Available-for-sale securities without market quotations  
Stated at cost using the moving-average method
- B. Derivatives  
Stated mainly at market
- C. Inventories  
Stated at the lower of cost
- |  |   |
|--|---|
| Merchandise and finished goods and work in process | Mainly by the average method or first-in first-out method |
| Raw materials and supplies                         | Mainly by the average method or last cost method          |
- 2) Depreciation & amortization method for important depreciable assets
- A. Property, plant and equipment (excluding leased assets)  
The declining-balance method is applied for the Company and its domestic consolidated subsidiaries. However, the straight-line method is applied for buildings acquired on and after April 1, 1998 (excluding any building fixtures). Overseas consolidated subsidiaries are mainly subject to the straight-line method.
- The main economic useful lives are as follows:
- |                                   |              |
|-----------------------------------|--------------|
| Buildings and structures          | 3 - 50 years |
| Machinery, equipment and vehicles | 2 - 15 years |
| Tools, furniture and fixtures     | 2 - 20 years |

B. Intangible assets (excluding leased assets) and long-term prepaid expenses  
The Company and its domestic consolidated subsidiaries use the straight-line method. However, software bundled with computer hardware is amortized every fiscal year by no less than an equal amount calculated based on effective years (1 - 5 years), and computer software for internal use is amortized by the straight-line method over the estimated useful life (5 years). Overseas consolidated subsidiaries are subject to the straight-line method.

C. Leased assets  
Leased assets pertaining to finance leases without ownership transfer of the leased assets to the lessee  
The straight-line method is applied on the assumptions that the useful life equals the lease term and the residual value is zero.

3) Standards for recognition of important reserves

A. Allowance for doubtful accounts  
For loss caused by uncollectible debt to the Company and its domestic consolidated subsidiaries, an allowance for doubtful accounts is provided based on the historical write-off rate for ordinary receivables and the estimated amount of irrecoverable debt based on the recoverability of individual cases for specified receivables such as debt with a possibility of default. For overseas consolidated subsidiaries, the estimated write-off amount is provided.

B. Provision for bonuses  
A provision for bonuses is provided based on the estimated future payment of bonuses to employees.

C. Provision for directors' retirement benefits  
The system of directors' retirement benefits was abolished with a cut-off date of June 28, 2007. The estimated amount payable as of the cut-off date is provided. The ten consolidated subsidiaries provide the provision in an amount that would be required by the internal rule if all the eligible Directors retired at the balance sheet date.

4) Method of accounting for retirement benefits

A. Method of attributing expected retirement benefits to periods  
In calculating the retirement benefit obligations, the straight-line basis is used to attribute the expected retirement benefits to the period up to the end of the current fiscal year.

B. Method of recognizing actuarial gains and losses and past service cost  
Actuarial gains and losses are amortized on a straight-line basis over a period equal to or less than the average remaining service period for employees at the time of each fiscal year in which such gains and losses are realized (10 years). The amortization of net gains and losses starts from the fiscal year immediately following the year in which such gains and losses are realized. Past service cost is expensed wholly in the fiscal year in which it is realized.

C. Application of simplified accounting method by small-size enterprises  
In calculating the liability for retirement benefits (net defined benefit liability) and retirement benefit expenses, certain consolidated subsidiaries apply a simplified accounting method in which retirement benefit obligations are determined based on the amount of retirement benefits required to pay if all eligible employees retired voluntarily at the balance sheet date.

5) Standards for translation of important assets or liabilities in foreign currencies into yen

Monetary assets and liabilities in foreign currencies are translated into yen based on the spot exchange-rate in the foreign exchange market on the consolidated balance sheet date, and the foreign exchange gains and losses from the translations are recognized in the income statement. Assets and liabilities of overseas consolidated subsidiaries are translated into yen based on the spot exchange-rate in the foreign exchange market on the consolidated balance sheet date, while revenue and expenses are translated into yen based on the average exchange rate for the fiscal term. The differences resulting from these translations are included in "Foreign currency translation adjustment" and "Minority interests" under net assets.

6) Accounting for important hedging activities

A. Method

Deferred hedge accounting is applied.

Designation is applied to forward exchange contracts that qualify for designation, and designated exceptional accounting is applied to interest-rate swaps that qualify for exceptional accounting.

B. Means for hedging and hedged item

<u>Means for hedging</u>	<u>Hedged item</u>
Interest-rate swap	Long-term loans payable
Forward exchange contract	Foreign currency receivables (including forecast transactions)

C. Hedging policy

Based on internal rules, hedging is limited to transactions (including forecast transactions) in the scope of practical purposes under the management of the Company's department in charge of finance, and is undertaken to avoid future risks from fluctuations in interest rates and foreign exchange rates.

D. Method for assessing the effectiveness of hedges

At the start of hedging, the Company assesses the effectiveness of offset in interest rate or foreign exchange rate fluctuation. Then, during the period of hedging, the Company uses the predetermined assessment method to assess whether the high effectiveness of offset is maintained at every fiscal year-end. For forward exchange contracts, assessment of the effectiveness of hedges is omitted as important terms regarding hedged items and means for hedging are the same, and changes in the cash flow from foreign exchange rate fluctuations are expected to be completely offset. Assessment of the effectiveness of interest-rate swaps subject to designated exceptional accounting is also omitted.

7) Accounting for consumption taxes

The tax-exclusion method is applied for consumption tax and local consumption tax.

**(5) Change of accounting policy**

The "Accounting Standard for Retirement Benefits" (ASBJ Statement No. 26, May 17, 2012; hereinafter the "Accounting Standard") and the "Guidance on Accounting Standard for Retirement Benefits" (ASBJ Guidance No. 25, May 17, 2012; hereinafter the "Guidance") are applied from the end of the current fiscal year (excluding, however, provisions under the main clause of Paragraph 35 of the Accounting Standard and the main clause of Paragraph 67 of the Guidance). Consequently, the Company has changed its accounting policy to the method of recording the amount obtained by deducting plan assets from retirement benefit obligations as net defined benefit liability, and recorded unrecognized actuarial losses to net defined benefit liability.

The Accounting Standard and the Guidance are applied in accordance with the transitional measures as provided for in Paragraph 37 of the Accounting Standard, and the impact of this change has been added to or deducted from the remeasurements of defined benefit plans under accumulated other comprehensive income at the end of the current fiscal year.

As a result, as of the end of the current fiscal year, 5,270 million yen of net defined benefit liability was recorded. In addition, accumulated other comprehensive income increased by 44 million yen.

Net assets per share increased by 0.30 yen.

## 2. Notes to Consolidated Balance Sheet

### (1) Assets offered as collateral and collateralized loans

(Assets offered as collateral)

Buildings and structures	12,683 million yen
Machinery, equipment and vehicles	975 million yen
Land	5,546 million yen
Intangible assets	331 million yen
Investment securities	1,994 million yen
<b>Total</b>	<b>21,532 million yen</b>
of which assets offered as foundation mortgage	5,350 million yen

(Collateralized loans)

Short-term loans payable	32,315 million yen
Long-term loans payable	18,096 million yen
<b>Total</b>	<b>50,411 million yen</b>
of which loans collateralized as foundation mortgage	41,955 million yen

- (2) **Accumulated depreciation of property, plant and equipment** 41,626 million yen  
The accumulated amount of impairment loss is included in the amount of accumulated depreciation.

- (3) **Notes discounted** 93 million yen

### (4) Financial covenants

Among loans, an amount of 11,761 million yen is subject to financial covenants, primarily the following covenant.

Ordinary income (loss) presented in the consolidated statement of income (for part of the covenant, ordinary income or loss in the Company's non-consolidated statement of income) for the accounting period of each fiscal year shall not be allowed to become a loss for two consecutive fiscal years.

## 3. Notes to Consolidated Statement of Changes in Equity

### (1) Type and total number of issued shares as of this fiscal year-end

Common shares 149,370,899 shares

### (2) Dividends

(Dividends whose record date is during this fiscal year but whose effective date is after the end of this fiscal year)

The following dividend for common shares will be proposed for approval at the Ordinary General Meeting of Shareholders to be held on March 26, 2015.

Resolution	Type of stock	Source of dividend	Total dividends (In millions of yen)	Dividend per share (yen)	Record date	Effective date
Ordinary General Meeting of Shareholders on March 26, 2015	Common shares	Retained earnings	596	4.00	December 31, 2014	March 27, 2015

#### 4. Notes on Financial Instruments

##### (1) Status of financial instruments

The Group procures necessary funds mainly by borrowing from financial institutions based on the capital investment plan. A temporary surplus fund is invested in financial assets that are highly secure.

For customer credit risk concerning trade receivables (notes and accounts receivable - trade), write-off risk is kept lower by the division in charge according to the credit control rules. Investment securities are mainly stocks and the market value of listed stocks is checked quarterly.

Borrowed money is used for working funds (mainly short-term) and capital investment funds (long-term). Interest-swap contracts are used against the interest fluctuation risk of some long-term loans payable, in order to fix the amount of interest expenses. Derivative transactions (related to foreign exchange and interest rate) are conducted only in the scope of practical purposes according to the internal control rules.

##### (2) Fair value of financial instruments

The amounts posted on the consolidated balance sheet, fair values, and differences thereof as of December 31, 2014 (consolidated balance sheet date for this fiscal year) are as follows:

Financial instruments whose fair value is deemed to be difficult to identify are not included.

(million yen)			
	Consolidated balance sheet amount (*1)	Fair value (*1)	Difference
(1) Cash and deposits	9,491	9,491	—
(2) Notes and accounts receivable - trade (*2)	30,706	30,706	—
(3) Investment securities Other securities	2,629	2,629	—
(4) Notes and accounts payable - trade	[13,892]	[13,892]	—
(5) Short-term loans payable (*3)	[39,991]	[39,991]	—
(6) Long-term loans payable (*3)	[34,251]	[34,318]	66
(7) Derivative transactions			
of which hedge accounting is not applied	[2,789]	[2,789]	—
of which hedge accounting is applied	[4]	[4]	—

(\*1) Amounts for which the net total is payable are shown in [ ].

(\*2) Notes and accounts receivable - trade are the net of the allowance for doubtful accounts.

(\*3) Current portion of long-term loans payable, an item included in short-term loans payable in the consolidated balance sheet, is included in long-term loans payable here.

##### Note 1: Method for calculating the fair value of financial instruments

###### (1) Cash and deposits, and (2) Notes and accounts receivable - trade:

Since the settlement periods for the foregoing are short, the fair values thereof are almost equal to the carrying amount. Therefore, the corresponding carrying amount is used as the fair value.

###### (3) Investment securities:

The going share price on the exchange is used as the fair value.

###### (4) Notes and accounts payable - trade and (5) Short-term loans payable:

Since the settlement periods for the foregoing are short, the fair values thereof are almost equal to the carrying amount. Therefore, the corresponding carrying amount is used as the fair value.

###### (6) Long-term loans payable:

The fair value of long-term loans payable is calculated by discounting the sum of principal and interest by an interest rate assumed in cases where similar borrowing is to be newly conducted. The fair value of long-term loans payable with variable interest rates to which special treatment of interest rate swaps is applied (see (7) below) is calculated by discounting the sum of principal and interest, which is treated in combination with the said interest rate swap, at a reasonably estimated rate applied to a similar new borrowing.

(7) Derivative transactions:

The fair value of derivative transactions is calculated based on the prices submitted by financial institutions.

The fair value of interest rate swaps to which special treatment is applied is included in the fair value of the hedged long-term loans payable, because these transactions are treated in combination with the said long-term loans payable (see (6) above).

Note 2: Non-listed stocks (422 million yen included in the consolidated balance sheet) are not included in “(3) Investment securities, Other securities” as the identification of the fair values is deemed to be extremely difficult because of the absence of market values and the inability to estimate future cash flows.

## 5. Notes on Per Share Information

(1) Net assets per share 160.82 yen

(2) Net income per share 43.83 yen

## 6. Other Notes

## Notes to Non-consolidated Financial Statements

### 1. Notes on Significant Accounting Policies

#### (1) Standards and methods for valuation of assets

##### 1) Securities

Shares of subsidiaries and associates

Stated at cost using the moving-average method

Available-for-sale securities with market quotations

Stated based on the market price, etc. on the balance sheet date

(Unrealized gains and losses are excluded from income and reported in a separate component of net assets. The cost of sales is calculated using the moving-average method.)

Available-for-sale securities without market quotations

Stated at cost using the moving-average method

##### 2) Derivatives

Stated mainly at market

##### 3) Inventories

Stated at the lower of cost

Merchandise and finished goods and work in process      Using the average method

Raw materials and supplies      Using the last cost method

#### (2) Depreciation & amortization method for non-current assets

##### 1) Property, plant and equipment (excluding leased assets)

The declining-balance method is applied. However, the straight-line method is applied for buildings acquired on and after April 1, 1998 (excluding any building fixtures).

The main economic useful lives are as follows:

Buildings      3 - 50 years

Structures      3 - 50 years

Machinery and equipment and vehicles      2 - 15 years

Tools, furniture and fixtures      2 - 20 years

##### 2) Intangible assets (excluding leased assets) and long-term prepaid expenses

The straight-line method is applied. However, computer software for internal use is amortized by the straight-line method over the estimated useful life (5 years).

##### 3) Leased assets

Leased assets pertaining to finance leases without ownership transfer of the leased assets to the lessee

The straight-line method is applied on the assumptions that the useful life equals the lease term and the residual value is zero.

#### (3) Standards for recognition of reserves

##### 1) Allowance for doubtful accounts

For loss caused by uncollectible debt, an allowance for doubtful accounts is provided based on the historical write-off rate for ordinary receivables and the estimated amount of irrecoverable debt based on the recoverability of individual cases for specified receivables such as debt with a possibility of default.

##### 2) Provision for retirement benefits

A provision for retirement benefits is provided based on the estimated retirement benefit obligation and plan assets as of this fiscal year-end.

##### A. Method of attributing expected retirement benefits to periods

In calculating the retirement benefit obligations, the straight-line basis is used to attribute the expected retirement benefits to the period up to the end of the current fiscal year.

- B. Method of recognizing actuarial gains and losses and past service cost  
 Past service cost is expensed wholly in the fiscal year in which it is realized.  
 Actuarial gains and losses are amortized on a straight-line basis over a period equal to or less than the average remaining service period for employees at the time such gains and losses are realized (10 years). The amortization of net gains and losses starts from the fiscal year immediately following the year in which such gains and losses are realized.

3) Provision for directors' retirement benefits

The system of directors' retirement benefits was abolished with a cut-off date of June 28, 2007. The estimated amount payable as of the cut-off date is provided.

**(4) Other significant basic matters for the preparation of financial statements**

1) Standards for translation of assets and liabilities in foreign currencies into yen

Monetary assets and liabilities in foreign currencies are translated into yen based on the spot exchange-rate in the foreign exchange market on the balance sheet date, and the foreign exchange gains and losses from the translations are recognized in the income statement.

2) Accounting for hedging activities

A. Method

Deferred hedge accounting is applied.

Designation is applied to forward exchange contracts that qualify for designation, and designated exceptional accounting is applied to interest-rate swaps that qualify for exceptional accounting.

B. Means for hedging and hedged item

Means for hedging	Hedged item
Interest-rate swap	Long-term loans payable
Forward exchange contract	Foreign currency receivables (including forecast transactions)

C. Hedging policy

Based on internal rules, hedging is limited to transactions (including forecast transactions) in the scope of practical purposes under the management of the department in charge of finance, and is undertaken to avoid future risks from fluctuations in interest rates and foreign exchange rates.

D. Method for assessing the effectiveness of hedges

At the start of hedging, the Company assesses the effectiveness of offset in interest rate or foreign exchange rate fluctuation. Then, during the period of hedging, the Company uses the predetermined assessment method to assess whether the high effectiveness of offset is maintained at every fiscal year-end. For forward exchange contracts, assessment of the effectiveness of hedges is omitted as important terms regarding hedged items and means for hedging are the same, and changes in the cash flow from foreign exchange rate fluctuations are expected to be completely offset. Assessment of the effectiveness of interest-rate swaps subject to designated exceptional accounting is also omitted.

3) Method of accounting for retirement benefits

The accounting methods for unrecognized actuarial gains and losses relating to retirement benefits are different from the accounting methods in the consolidated financial statements.

4) Accounting for consumption taxes

The tax-exclusion method is applied for consumption tax and local consumption tax.

**(5) Change of presentation method**

"Foreign exchange gains" (55 million yen for the previous fiscal year), an item included in "Other" under non-operating income in the previous fiscal year, has become material and is therefore presented separately from this fiscal year.

Pursuant to Paragraph 4 of Article 444 of the Companies Act, we have audited the consolidated financial statements, that is, the consolidated balance sheet, consolidated statement of income, consolidated statement of changes in equity and notes to consolidated financial statements of JUKI CORPORATION (the "Company") for the fiscal term from January 1, 2014 to December 31, 2014.

**The responsibility of management concerning the consolidated financial statements**

The responsibility of management is to prepare consolidated financial statements in accordance with business accounting standards generally accepted in Japan and present appropriate accounting information. This responsibility includes the establishment and operation of internal controls deemed necessary by management for the preparation of consolidated financial statements free of material misstatement due to fraud or error and the presentation of appropriate accounting information.

**The responsibility of independent auditors**

Our responsibility is to express an opinion independently on the consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in Japan. Those auditing standards require that we plan and perform the audit to obtain reasonable assurance as to whether the consolidated financial statements are free of material misstatement.

In audits, procedures are conducted in order to obtain audit evidence supporting the amounts and disclosures in the consolidated financial statements. Audit procedures are chosen and applied in accordance with our judgment, based on the risk assessment of material misstatement in the consolidated financial statements due to fraud or error. The purpose of an audit is not to express an opinion on the effectiveness of internal controls. However, we examine internal controls related to the preparation of consolidated financial statements and the appropriate presentation in the course of conducting risk assessment, in order to plan audit procedures appropriate to the circumstances. An audit includes assessing the accounting policies used, its application method and estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that we have obtained sufficient and appropriate audit evidence to support our audit opinion.

**Audit opinion**

In our opinion, the above consolidated financial statements fairly present, in every material aspect, the financial position and results of operations of the Group consisting of the Company and its consolidated subsidiaries for the relevant term of the consolidated financial statements, in accordance with the business accounting standards generally accepted in Japan.

Interests in the Company

Our firm and engagement partners have no interest in the Company which shall be disclosed pursuant to the provisions of the Certified Public Accountants Act.

Certified copy of the Audit & Supervisory Board's audit report

### **Audit Report**

The Audit & Supervisory Board, following review and deliberations on the reports made by each Audit & Supervisory Board Member concerning the execution of duties by Directors for the 100th fiscal term from January 1, 2014 to December 31, 2014, prepared this Audit Report and hereby submit it as follows:

#### 1. Summary of Auditing Methods by Audit & Supervisory Board Members and the Audit & Supervisory Board

The Audit & Supervisory Board established auditing policies and the division of duties, received reports regarding the status of audits and the results thereof from each Audit & Supervisory Board Member, received reports regarding the status of the execution of duties from Directors and the Accounting Auditor, and requested explanation as necessary.

In accordance with the auditing standards for Audit & Supervisory Board Members determined by the Audit & Supervisory Board, and in compliance with auditing policies and the division of duties, each Audit & Supervisory Board Member made efforts to collect information and establish auditing circumstances through communication with Directors, internal audit staff and other employees, and attended the Board of Directors' meetings and other important meetings to receive reports regarding execution of duties from Directors and employees, and requested explanations as necessary. Each Audit & Supervisory Board Member also inspected the approved documents and examined the status of operations and conditions of assets at the head office and principal offices. Each Audit & Supervisory Board Member verified the resolutions adopted by the Board of Directors regarding the establishment of a system for ensuring that the Directors' duties, as stated in the business report, are executed in conformity of laws and regulations, and the Articles of Incorporation of the Company, and the establishment of a system necessary to ensure proper business operations of a stock company set forth in Paragraphs 1 and 3 of Article 100 of the Ordinance for Enforcement of the Companies Act. It also regularly received reports from Directors and employees on the status of the establishment and operation of the system (internal control system) established in accordance with such resolutions adopted by the Board of Directors, and requested explanations as necessary and expressed his/her opinions. With regard to the internal control over financial reporting, Audit & Supervisory Board Members received reports from Directors and Deloitte Touche Tohmatsu LLC on the status of discussion between them and the evaluation of such internal control and the status of audit, and requested explanations as necessary.

Audit & Supervisory Board Members communicated and shared information with the directors etc. of the subsidiaries and received from the subsidiaries their business reports as necessary. In accordance with the procedures mentioned above, we reviewed the business reports and supplementary schedules for the fiscal term ended December 31, 2014.

Further, Audit & Supervisory Board Members monitored and verified that the Accounting Auditor maintains independence and conduct the audits appropriately. Each Audit & Supervisory Board Member also received reports on the status of the execution of duties from Accounting Auditor and requested explanation as necessary. In addition, we were informed of the arrangement of the "System for ensuring that the duties are performed appropriately" (matters stipulated in the items of Article 131 of the Corporate Calculation Regulations in accordance with "Standards for the Quality Control of Audits" (Business Accounting Council, October 28, 2005)) from the Accounting Auditor and requested explanations as necessary. In accordance with the procedures mentioned above, we reviewed the non-consolidated financial statements (non-consolidated balance sheet, non-consolidated statement of income, non-consolidated statement of changes in equity and notes to non-consolidated financial statements), the supplementary schedules thereto, and the consolidated financial statements (consolidated balance sheet, consolidated statement of income, consolidated statement of changes in equity and notes to consolidated financial statements) for the fiscal term ended December 31, 2014.

## 2. Results of Audit

### (1) Results of Audit of Business Report and Other Relevant Documents

## Reference Materials for the Ordinary General Meeting of Shareholders

### Proposals and Reference Information

#### First proposal: Appropriation of Surplus

For distribution of profit, we maintain the basic policy of striving to improve the return of profit to our shareholders based on the stable payment of dividends in comprehensive consideration of factors such as the results of the current fiscal year and the internal reserve provided for future business development.

Based on this policy, we would like to offer the following as a year-end dividend for the 100th fiscal year:

#### Year-end dividend

**(1) Type of dividend assets**

Cash

**(2) Distribution of dividend assets to shareholders and the total amount of dividends**

Payment of 4.00 yen per share of common shares (Total amount of dividends: 596,809,952 yen)

**(3) Effective date of distribution of surplus**

March 27, 2015

## **Second proposal: Share Consolidation**

### 1. Reasons necessitating share consolidation

Japan's securities exchanges have announced the "Action Plan for Consolidating Trading Units," with the aim of standardizing the trading unit for common shares for all listed companies in Japan at 100 shares per unit.

In consideration of this background and the Company's status as an enterprise listed on the Tokyo Stock Exchange, the Company has decided to change its number of shares per share unit as a trading unit for the Company's shares from the present number of 1,000 shares to 100 shares. In addition, aiming to ensure that the share unit value of the Company's shares is within the security exchanges' preferred investment unit level (at least 50,000 yen and less than 500,000 yen), the Company has decided to carry out the share consolidation.

### 2. Ratio of share consolidation

With regard to the common shares of the Company, five (5) shares will be consolidated into one (1) share.

If a fraction of less than one (1) share is created as a result of share consolidation, such fractional shares will be disposed together pursuant to the Companies Act, and the proceeds will be distributed to shareholders in proportion to the number of fractional shares they hold.

### 3. Effective date of share consolidation

July 1, 2015

### 4. Other

Share consolidation pertaining to this proposal will be executed provided that the third proposal "Partial Amendments to the Articles of Incorporation" is approved.

The Company requests that other matters required for the procedures be left to the discretion of the Board of Directors.

Note: Although the share consolidation will result in a reduction in the total number of issued shares to one-fifth of the present number, there will be no change in net assets or the like, meaning that net assets per share will be five times the current amount. Therefore, there will be no change in the respective asset value of shares of the Company held by each shareholder, except when impacted by other factors such as fluctuations of the stock market.

### Third proposal: Partial Amendments to the Articles of Incorporation

1. Reasons for the proposal

On condition that the second proposal “Share Consolidation” is approved, we will make changes to Article 6 “Total Number of Authorized Shares” and Article 8 “Number of Shares per Share Unit” of our current Articles of Incorporation in association with our decision to change the number of shares per share unit from 1,000 shares to 100 shares in response to the “Action Plan for Consolidating Trading Units” called for by Japan’s securities exchanges.

Note that we will add a supplementary provision stipulating that these changes will take effect on July 1, 2015, which is the effective date of the share consolidation, and that the supplementary provision will be deleted upon the same date.

2. Details

Details of the amendment are as follows:

- (Notes)
1. There are no conflicts of interest between the Company and any of the above candidates for Directors.
  2. Mr. Toshihiko Ozaki and Mr. Kazumi Nagasaki are candidates for Outside Directors.
  3. Mr. Toshihiko Ozaki and Mr. Kazumi Nagasaki are nominated as candidates for Outside Directors because we expect them to serve as competent Outside Directors and to appropriately provide advice and make decisions from an objective and neutral position, based on their broad experience and knowledge as corporate managers and their considerable insight and supervisory abilities with regard to corporate management.
  4. Mr. Toshihiko Ozaki, currently an Outside Director of the Company, will have been in office for four years and nine months at the conclusion of this General Meeting of Shareholders.
  5. Mr. Kazumi Nagasaki, currently an Outside Director of the Company, will have been in office for one year at the conclusion of this General Meeting of Shareholders.
  6. Upon the approval of Mr. Toshihiko Ozaki and Mr. Kazumi Nagasaki's election in this proposed resolution, the Company will conclude "Contracts for Limitation of Liability" with them for the purpose of limiting their liability, as provided for in Paragraph 1 of Article 423 of the Companies Act, in accordance with Article 31 of the Company's Articles of Incorporation. The maximum amount of liability under said contract is the amount provided for in laws and regulations.
  7. Mr. Toshihiko Ozaki and Mr. Kazumi Nagasaki are such independent directors as specified by the Tokyo Stock Exchange.

### Fifth proposal: Election of 2 Substitute Audit & Supervisory Board Members

The resolution by the General Meeting of Shareholders on the election of substitute Audit & Supervisory Board Members, Mr. Yasuaki Isobe and Mr. Yutaka Hori, shall remain in effect until the start of this General Meeting of Shareholders. Accordingly, in order to prepare for a case in which the number of Audit & Supervisory Board Members falls short of the number stipulated by laws and regulations, the election of 2 substitute Audit & Supervisory Board Members is proposed.

The Audit & Supervisory Board consented to the proposal of this resolution.

The candidates for substitute Audit & Supervisory Board Members are as follows:
