## 1. Qualitative information regarding consolidated performance for the first nine months

### (1) Explanation regarding operating results

In the nine months ended September 30, 2015, net sales were 83,215 million yen (up by 8.4% from the same period of the previous fiscal year) as a result of factors including firm performance in sales for the Sewing Machinery Business in Asia's emerging markets continuing on from the previous fiscal year, a focus on acquiring new customers and expanding areas of business that deliver high rates of return, and the effect of yen depreciation.

With respect to profits, although the Sewing Machinery Business performed firmly, operating income was 5,514 million yen (down by 5.7% from the same period of the previous fiscal year) due mainly to a drop in sales reflecting a sharp fall in capital investment demand, mainly in the Electronic Assembly Systems Business field, as the effects of the economic slowdown in China became apparent during the third quarter, as well as lower rates of return for profits reflecting price competition with our competitors which escalated to a more intense level. Moreover, ordinary income was 4,442 million yen (down by 17.3% from the same period of the previous fiscal year) and net income of 2,899 million yen (down by 31.2% from the same period of the previous fiscal year) due mainly to the depreciation of emerging country currencies such as the Chinese renminbi and the Indian rupee resulting in valuation losses that were recorded as foreign exchange losses during the third quarter.

(Business overview by primary segment)

#### a. Sewing Machinery Business

In the apparel sewing industry, sales expanded in emerging Asian regions, Vietnam and Bangladesh in particular, and regions such as Latin America and Africa. By product, sales to manufacturers of non-apparel sewn products such as car seats and sport shoes increased along with sales of automated sewing machines for the apparel sector, which were driven by needs for automation. As a result, net sales of the Sewing Machinery Business as a whole were 62,965 million yen (up by 13.2% from the same period of the previous fiscal year).

#### b. Electronic Assembly Systems Business

Despite sales increases in newly released mounters and labor-saving systems, in China, our largest market, the effect of the economic slowdown emerged as we entered the third quarter, with a sharp decline in capital investment demand leading to a decline in sales. As a result, net sales of the Electronic Assembly Systems Business as a whole were 15,682 million yen (down by 0.7% from the same period of the previous fiscal year).

### (2) Explanation regarding financial position

Assets, liabilities and net assets

Total assets as of September 30, 2015 were 123,218 million yen, a decrease of 7,532 million yen compared to the previous fiscal year-end. This was mainly due to decreases in notes and accounts receivable - trade and inventories. Liabilities were 95,322 million yen, a decrease of 10,418 million yen compared to the previous fiscal year-end. This primarily reflected a decrease in notes and accounts payable - trade. Net assets were 27,896 million yen, an increase of 2,886 million yen compared to the previous fiscal year-end. This was mainly due to the recording of net income and the transfer of the amount of impact from a change in the accounting standard for retirement benefits to retained earnings at the beginning of the period.

Consequently, short-term and long-term loans payable as of September 30, 2015 were 68,705 million yen, a decrease of 5,537 million yen compared to the previous fiscal year-end, and the equity ratio was 21.9%, an increase of 3.5 percentage points over that of the previous fiscal year-end.

**(3) Explanation regarding forward-looking statements such as consolidated earnings forecasts**

The consolidated earnings forecasts for the fiscal year ending December 31, 2015 have been revised from those previously announced (February 12, 2015). Net sales are now forecast at 110,000 million yen, operating income at 6,800 million yen, ordinary income at 5,600 million yen, and net income at 3,700 million yen. The revision reflects a sharp decline in capital investment demand and other factors driving sales down below initial forecasts as well as lower rates of return for profits due to price competition in the Electronic Assembly Systems Business; although the Sewing Machinery Business has performed steadily.

The assumed foreign exchange rate used in the consolidated earnings forecasts for the fourth quarter is 115 yen to one U.S. dollar.

For a detailed description, please refer to “Notice of Revision to Earnings Forecasts for the Fiscal Year Ending December 31, 2015” which was disclosed separately today.

The fiscal year-end dividend forecast has not been revised, and accordingly remains at 25 yen per share as previously announced (if the share consolidation is not taken into account, the amount is 5 yen).

## **2. Matters regarding summary information (Notes)**

### **(1) Changes in significant subsidiaries during the nine months under review**

No items to report.

### **(2) Application of special accounting for preparing quarterly consolidated financial statements**

(Calculation of taxes)

Taxes are calculated by reasonably estimating the effective tax rate after application of tax effect accounting to income before income taxes for the fiscal year, and multiplying the quarterly income before income taxes by such estimated effective tax rate.

It should be noted that income taxes-deferred are included in income taxes.

### **(3) Changes in accounting policies, changes in accounting estimates, and restatement of prior period financial statements after error corrections**

Changes in accounting policies

(Application of the Accounting Standard for Retirement Benefits, etc.)

Regarding the “Accounting Standard for Retirement Benefits” (ASBJ Statement No. 26, May 17, 2012; hereinafter the “Accounting Standard”) and the “Guidance on Accounting Standard for Retirement Benefits” (ASBJ Guidance No. 25, March 26, 2015; hereinafter the “Guidance”), effective from the first quarter ended March 31, 2015, the Company has applied the provisions of the main clauses of Paragraph 35 of the Accounting Standard and Paragraph 67 of the Guidance, reviewed its calculation method for retirement benefit obligations and service costs, and changed its method of attributing expected benefits to periods from the straight-line basis to the benefit formula basis. In addition, the Company has changed the method for determining the discount rate from one that uses a discount rate based on a period approximate to the expected average remaining working lives of employees, to one that uses a single weighted average discount rate reflecting each estimated timing and amount of benefit payment.

Application of the Accounting Standard and Guidance is in line with the transitional measures provided in Paragraph 37 of the Accounting Standard, and the effect of the revision to the calculation method for retirement benefit obligations and service costs has been added to or deducted from retained earnings as of January 1, 2015.

As a result, net defined benefit asset as of January 1, 2015 (included and recorded in “Other” under investments and other assets) increased by 806 million yen, net defined benefit liability decreased by 394 million yen and retained earnings increased by 1,087 million yen. The impact of this change on profit and loss for the nine months ended September 30, 2015, is immaterial.
