1. Qualitative information regarding consolidated performance for the first three months

(1) Explanation regarding operating results

During the three months ended March 31, 2020, the business environment was affected as business activities at companies continued to stagnate amid restrictions against travel between and within countries around the world due to the spread of the novel coronavirus disease (COVID-19), and there was a rapid slowdown in the global economy. Under the vision “a *Mono-Koto dzukuri* (manufacturing-value creation) enterprise, capable of elevating the corporate value of both JUKI and its customers through JUKI products and services” of the Medium-Term Management Plan Phase II, which serves as the focal point for structural reforms from 2020 to 2022, the Company will carry out structural reforms centered on the “5 Reforms*.” To accomplish this, the Company has (i) carried out cost structural reforms through streamlining, etc. of administrative and indirect operations, (ii) maximized added value by expanding business areas, such as by strengthening sales capabilities in highly profitable areas and (iii) strengthened the customer base by eliminating borders, such as by improving efforts to develop the middle market.

However, the overall conditions in the business environment surrounding the Company are quite challenging because, although the Company’s factories in China, Vietnam and Japan are able to operate as normal, operations at the sewing factories, electronic component factories, etc., of our customers in various countries and regions have stopped and companies are no longer conducting business due to the spread of COVID-19. Affected by these factors, sales struggled in each region the Company operates in, resulting in net sales of 16,860 million yen (down by 34.5% from the same period of the previous fiscal year). In terms of profits, we worked to reduce costs and restructured the organization in an effort to minimize expenses, but the impact of the decline in sales and lower capacity utilization rates at factories resulted in operating loss of 1,472 million yen (compared to operating profit of 1,349 million yen for the same period of the previous fiscal year). Ordinary loss stood at 1,732 million yen (compared to ordinary profit of 1,103 million yen for the same period of the previous fiscal year), and loss attributable to owners of parent stood at 1,836 million yen (compared to profit attributable to owners of parent of 727 million yen for the same period of the previous fiscal year).

To respond to this situation, the Company will further deepen the structural reforms that were started at the beginning of the fiscal year, proceed with cost reductions in the second quarter of 1.6 billion yen from the previous fiscal year through significant production adjustments, including a stoppage of all operations at the head office and Group factories in Japan and overseas, a temporary suspension of administrative (indirect) functions, personnel system reforms, including treatment, a review of the capital investment plan, etc. and while improving profitability, review work operations through the establishment of specialized departments, introduce RPA, improve work efficiency, such as by making the necessary preparations for teleworking, and further improve productivity, including in indirect functions. In addition, officers have voluntarily returned a portion of their remuneration (monthly remuneration and bonuses).

(* 5 Reforms = (i) Develop markets and customer with potential for growth, (ii) Expand business areas for increasing profitability, (iii) Expand innovative technical areas, (iv) Construct a production organization and administrative (indirect) work organization centered on the management 5Ss (Simple, Slim, Speedy, Seamless and Smart) and (v) Conduct “sustainable” management)

(Business overview by primary segment)

a. Sewing Machinery and Systems Business

Sales declined in each market, resulting in net sales for the Sewing Machinery and Systems Business Segment as a whole of 10,662 million yen (down by 37.6% from the same period of the previous fiscal year). In terms of profits, we worked to reduce costs and restructured the organization in an effort to minimize expenses, but segment loss (ordinary loss) stood at 922 million yen (compared to segment profit of 795 million yen for the same period of the previous fiscal year) due to the impact of lower sales and lower capacity utilization rates.

b. Industrial Equipment and Systems Business

With respect to Electronic Assembly Systems Businesses, sales declined in China and other markets, and Group Businesses, such as contract manufacturing, have also seen sluggishness in

areas such as the in-car-related market. As a result, net sales of the Industrial Equipment and Systems Business Segment stood at 6,140 million yen (down by 28.7% from the same period of the previous fiscal year). In terms of profits, we worked to reduce costs and restructured the organization in an effort to minimize expenses, but segment loss (ordinary loss) stood at 384 million yen (compared to segment profit of 679 million yen for the same period of the previous fiscal year) due to the impact of lower sales and lower capacity utilization rates.

(2) Explanation regarding financial position

Assets, liabilities and net assets

Total assets as of March 31, 2020 were 110,486 million yen, a decrease of 4,229 million yen compared to the previous fiscal year-end. This was mainly due to a decrease in accounts receivable - trade. Liabilities were 75,987 million yen, a decrease of 976 million yen compared to the previous fiscal year-end. This mainly reflected a decrease in accounts payable - trade. Net assets were 34,499 million yen, a decrease of 3,252 million yen compared to the previous fiscal year-end. This was mainly due to a decrease in retained earnings reflecting the loss recorded for the period and payment of dividends, in addition to a higher negative value in foreign currency translation adjustment. Consequently, the equity ratio was 30.6%.

(3) Explanation regarding forward-looking statements such as consolidated earnings forecasts

Business activities at companies continued to stagnate amid restrictions against travel between and within countries around the world due to the spread of the novel coronavirus disease (COVID-19). At this time, it is difficult to predict when the spread of COVID-19 will be brought under control. Therefore, because it is difficult to reasonably calculate the earnings forecasts, the consolidated earnings forecasts for the fiscal year ending December 31, 2020 announced on February 14, 2020 are yet to be determined. The Company will announce the consolidated earnings forecasts once it is able to do so.

In addition, due to the above reason, the forecast of the year-end dividend for the fiscal year ending December 31, 2020 is yet to be determined and will be announced once the Company is able to calculate the consolidated earnings forecasts for the fiscal year ending December 31, 2020.
