How to check your machine model

◆Label on the machine

Check the electrical rating label on the back of the machine.

In the case of a label with product code

The product code is the model name.
*Model HC500-00 is not.

In the case of a label without product code

Model is the model name.

◆Instruction manual

Check the cover of the instruction manual.

Standard Presser Foot

This presser foot is used for regular overlock stitching.

The shape, functionality and guide line positions differ depending on the model. For details, refer to the manual supplied with your machine.

Blind Stitch Presser Foot (For Right Needle)

This presser foot is used to sew blind hem stitching while overlocking the edge of the fabric.

With this presser foot, the fabric edge, folded in three, can be inserted and the guide plate and positioned so that stitching will not be visible from the right side of the fabric. Since this presser foot is designed specifically for use with the right needle, it cannot be used with the left needle of a two-needle sewing machine.

Universal Blind Stitch Presser Foot (For Right & Left Needle)

This presser foot is used to sew blind hem stitching, decorative flatlock or pintucks.

This presser foot can be used with either the right or the left needle and has a guide plate that can be moved within a wide range. Since the seam width can be adjusted, this presser foot is also useful for decorating by sewing along a folded edge with decorative flatlock or with roll hem (pintuck) stitches.

Elasticator Presser Foot

This presser foot is used for sewing in elastic tape while overlocking the edge of the fabric.

Tension is applied to the elastic tape by the roller guide at the front of the presser foot, stretching the tape while it is sewn in. The tension can be adjusted with the roller clamping screw. Elastic tape with a width of 5 to 8 mm width is best.

Cording Presser Foot

This presser foot is used for sewing on nylon thread or wire for crafts.

Hook the nylon thread or wire on the two gimp guides before sewing. This will give tension to fabric edges, such as on frills, and prevent them from collapsing.

A9820-655-0A0A	—		A9820-655-0A0A	—

Beading Presser Foot

This presser foot is used for sewing on strands of pearls, beads or sequins.

Braiding of a width of up to 4 mm as well as transparent or decorative threads can be sewn on. The strand can also be sewn in the middle of fabric by sewing along a folded edge with flatlock.

Curved Beading Presser Foot

This presser foot is used for sewing on strands of pearls, beads or sequins along curves.

Braiding of a width of up to 4 mm can be sewn onto an outside curve (toward the left) with a diameter of at least 15 cm. This presser foot being short at the front allows it to easily follow curves.

A9511-634-0A0A	—		A9511-634-0A0A	—

Piping Presser Foot

This presser foot is used for sewing on piping while overlocking the edge of the fabric.

Sew along the edge of the piping with the tubular part of the tape fed into the groove along the bottom of this presser foot. Use either both needles or only the left needle with this presser foot.

Gathering Presser Foot

This presser foot is used for sewing together two pieces of fabric while creating gathers.

Using the differential feed, gathers can be created in only the lower piece. You can adjust the amount of fabric that is gathered by changing the differential feed between 1.5 and 2.0. Gathers can also be created in a single piece of fabric.

A9860-655-0A0C	40131948		—	

Gather Foot

This presser foot can gather in a single piece of fabric and has good ability for curve stitching.

Using the differential feed, gathers can be created in a single piece. You can adjust the amount of fabric that is gathered by changing the differential feed to N(1) or more. Since this presser foot length is shorter than the gathering presser foot curved stitches can be made smoothly.

–				

Tractor Presser Foot

The tractor presser foot smoothly rides up on and down from the multi-layered part of the material while preventing stitch skipping at that part.

Use the tractor presser foot for joining collars, shoulders, bottoms and sleeve cuffs. This presser foot does not use the presser holder.

MO-3000QVP MO-2800	MO-2000QVP MO-1000	MO-735N	MO-655N	MO-114DN MO-104DN

—				

Clear Presser Foot

Since this presser foot is transparent, it helps the operator to observe the stitches and the fabric with ease.

With this foot, you can see the needle point clearly. At the part to sew carefully such as multi-layered parts or curves, it is easier to sew while checking the condition of the fabric.

—				

Curve Foot

With this curve foot, you can handle the curved portions of the material smoothly and produce beautifully finished seams.

This foot is able to make small turns since it is smaller than the standard presser foot. It is useful for sewing small curves.

MO-3000QVP MO-2800	MO-2000QVP MO-1000	MO-735N	MO-655N	MO-114DN MO-104DN

—				

Taping Foot

This presser foot is used for sewing in tape while overlocking the edge of the fabric.

Feed the tape into the slot at the front of the presser foot, and adjust the guide according to the width of the tape. Use this presser foot to insert tape along shoulder seams in order to reinforce them.

Coverstitch Hem Guide

This guide is used for setting the folded width of the fabric and the stitching position for coverstitching.

This guide can set the folded width of the fabric and align the edge of the fabric from the back side, where it is difficult to see the coverstitching. First fold the fabric to the width that is to be sewn, and then adjust the guide according to the width of the fold. This guide is perfect for finishing pant and sleeve hems of clothes.

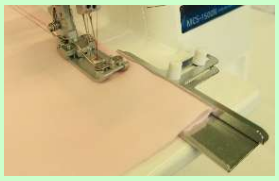
—				40177371

Coverstitch Hem Guide (with Material Guide)



In the case the hem guide is used with the sewing machine, the sewing machine is able to perform coverstitch while folding the material edge over a certain width (hem folding process).

In some cases of sewing a curve part of the material, it may be easier to sew the curve only using the material guide instead of using both the material guide and the hem guide.

MO-3000QVP MO-2800	MO-2000QVP MO-1000	MO-735N	MO-655N	MO-114DN MO-104DN

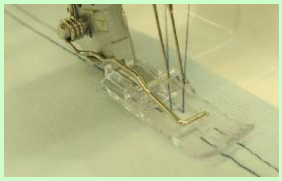
—				40255755

Cover Stitch Clear Presser Foot



Since this type of presser foot has a transparent foot, it is helpful to allow the operator to see stitches and material during sewing.

In the case of sewing the looped part such as T-shirt hem, this foot will assist you to see the needle point so clearly to overlap the stitches at the end of sewing with the beginning one.

—				40255760

Double Fold Bias Binder (30mm/8mm)

With this binder, the sewing machine is able to double-fold the 30 mm (13/16”) wide knit tape into approximately 8mm (5/16”) wide tape to bind the material edge.

With this binder, the sewing machine is able to attach knit tapes with two-thread chainstitch. The knit tapes are automatically folded to bind the garment edges such as neckline or to make straps such as shoulder straps of camisoles.

MO-3000QVP MO-2800	MO-2000QVP MO-1000	MO-735N	MO-655N	MO-114DN MO-104DN

MO-654DEN MO-644DN	MO-80CB	MO-50eN	MO-623N	MCS-1500N
—				40255758

Tape Stand

When you use a binder, etc., a bias tape can be set on this tape stand to allow it to be fed smoothly.

This tape stand prevents the bias tape from warping or the bias tape roll from coming off and rolling even when the sewing length is large.

MO-3000QVP MO-2800	MO-2000QVP MO-1000	MO-735N	MO-655N	MO-114DN MO-104DN

—				40255756

Belt Loop Binder

With this binder, it is easy to make 10 mm wide belt loops that are used for ready-made clothes.

The tapes are automatically folded and sewn with the coverstitch sewing.
Tape size: 20 mm
Finished size: 10 mm

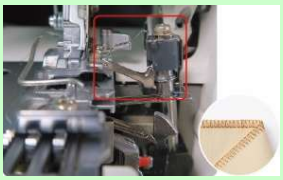
Upper Looper Converter



Two-thread overlocking or flatlock can be sewn with a 3/4-thread overlock sewing machine.

By covering the upper looper, you can sew with only two threads (lower looper thread and needle thread). Although two pieces of fabric cannot be sewn together, you can easily sew overlocking with two threads.

Waste Collector

This box collects scraps of fabric cut by the overlock sewing machine.

This is useful for throwing out all scraps after work is completed, without allowing them to scatter around the work area. When storing the sewing machine, accessories such as the foot controller can be stored in this box.
