## Discover the ultimate sewing dream team for your home!

With the powerful JUKI TL semi-professional sewing machine, the fantastic MO overlock serger, and the incredible EB-1 buttonhole device, you'll achieve industrial-quality stitching that will bring joy to your crafting endeavors!

## Beautiful Buttonhole Stitch

#### Seamlessly Stitch Buttonholes With No Jamming!

EB-1 stitches buttonhole patterns by moving the presser frame with material. You can rotate the pattern by 90 degrees in 4 different directions on a X and Y axis. This way, you can stitch vertical and horizontal buttonholes. In addition, sew buttonholes dense fabric with ease since no jamming happens. Achieve perfect a buttonhole stitch every time!

#### Easy-to-Use Clear Presser Frame

This 1 cm grid lets you easily set the sewing project for both X and Y axis. In addition, the clear presser frame easily allows you to place your starting T-position and check the mark on your favorite to sew accurate buttonholes.

#### Computerized Buttonhole Device

The EB-1 is a computerized buttonhole device that enables you to select from various buttonhole stitch patterns and other detailed settings.

2 Built-In Sensors

# Buttonhole Size is Optimized for Each Type of Button

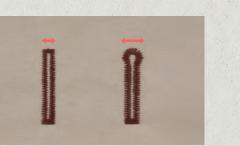

5mm-32mm Button Diameter Setting

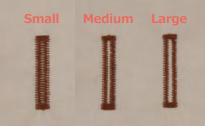

By inputting the diameter of button in 1mm increments, you stitch the appropriate buttonhole automatically. The EB-1 is capable of stitching buttonhole sizes from 5mm to 32mm. % 5mm is the minimum buttonhole size.

Set the value to fit the size of the button. For bartacking select from 3 to 7mm and for eyelet select from 6 to 7mm. Knife Width

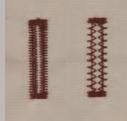

You can adjust the knife width in accordance with the button thickness.

## Flexible Seam Volume

Control Density with Stitch Length **F** Sewing Volume Setting

With a short stitch length, you can achieve a higher stitch density.

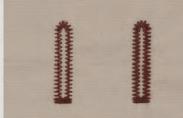

Setting Value

decorative buttonholes.

0.3、0.4、0.6、0.8、1.0、1.2、1.4、1.6、1.8 (mm)

Increase the length of the stitch to achieve reduce density for

X2

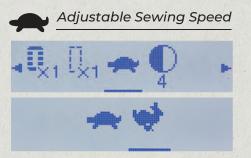

You can choose a single or double stitch. With double overlapped stitching, you can achieve sewing volume.

## Four Direction Layout

Accessible Features

Four rotation angles available including 0, 90, 180, and 270 to stitch both horizontal and vertical buttonhole.

Choose between two sewing speed: slow for turtle and fast for rabbit.

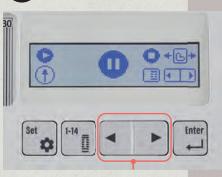

#### Useful Accessories

Difference-in-Height Correction Plate

The difference-in-height correction plate is used when sewing buttonholes on multilayered parts of the material.

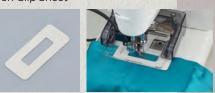

Even if the needle thread breaks, you can roll back and restart in the middle of buttonhole.

#### Set Memorize the Latest Setting

Memorize the latest setting including length, width, rotation angle and more.

Non-Slip Sheet

The non-slip sheet can be placed on a slippery fabric so that it does not easily slip. The sheet can also be cut to adjust its length as desired.

# Capable of Creating

a Basting

Prevent Fabric Stretching with the Basting

When you increase the number of basting, you can stitch stretchv materials like a knit more beautifully.
