

## Machine head rotation mechanism helps achieve high-quality seams uniformly in every sewing direction

JUKI's unique synchronization technology controls the machine head, hook and feed mechanism, thereby creating the most favorable seams. In case of continuous circumference sewing, the sewing machine constantly detects the direction of sewing. As a result, consistent-quality seams are produced regardless of the direction of sewing.

## Adopts a full-rotary double-capacity hook

The same full-rotary double-capacity hook as the PS-800 series is used. It provides stable sewing and reduces the time required for changing the lower thread.

### **Active tension**

Market-prov active tension has been introduced to the needle thread tension controller. With the active tension, pinpoint changes

in the needle thread tension during sewing are enabled. The needle thread tension, therefore, can be set in conjunction with the material thickness and can be corrected according to the direction of sewing on a stitch-by-stitch basis through the operation panel.

## Patterns are identified by means of RFID/Barcode reader to enable automatic reading of sewing data

Sewing patterns are automatically identified by means of RFID/ Barcode reader to automatically call up the relevant sewing program, thereby starting sewing quickly.

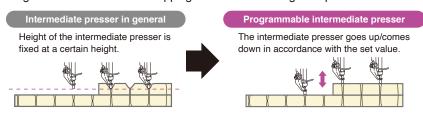

It is the technology to read and write data saved on IC chips through wireless non-contact transfer of radio frequency waves and is used to identify and manage products.

### **Intelligent Medium-Presser Foots**

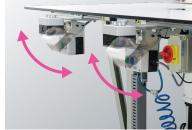

It is possible to change the intermediate presser height at its lower dead point steplessly during sewing. This feature is particularly effective when sewing multi-layered portions of material. Since the material is stably held by the intermediate presser, sewing troubles such as stitch skipping and thread breakage are prevented.

### **Operation switch**

The operation switch operates up and down, so the operator It can be adjusted to a position where it is easy to work. Reduces operator fatigue when sewing for long periods of time.

### **Operation panel**

The sewing pattern data format are supports DXF, AI, PLT, and DST. Sewing pattern data in these formats are widely used in many sewing plants. As a result, the operation panel is able to use the customers' existing sewing pattern data immediately. As many as 999 sewing patterns can be saved on the large-capacity memory of the operation panel. (Editing software is included with the accessory.)

PS-910AS6055ZKW (PS-910HS has one switch.)

#### Optional device

Option	Parts No.	Features	Remarks
BK-10 Bobbin changer device	40270689	Provided that a spare bobbin case which is loaded with a bobbin fully wounded with thread is set before starting sewing, automatic replacement of bobbin cases is enabled to spare the operator the trouble of changing bobbin cases by hand, thereby increasing production efficiency.	As many as seven spare bobbins can be placed in the cassette.
Barcode reader unit	40289310	Sewing pattern that matches the template can be called up when the barcode on the template is read by the barcode reader. (Air bag specifications are standard.)	
Needle thread clamp unit	40289313	The needle thread clamp unit prevents the needle thread and bobbin thread from becoming entangled at the start of the next sewing by grasping the tip of the needle thread after thread trimming.	

#### **SPECIFICATIONS**

Model name	PS-910HS-6055ZKZ PS-910HS-6055ZKW	PS-910AS-6055ZKZ PS-910AS-6055ZKW	
Sewing area	600 mm × 550 mm*1		
Max. sewing speed	3,000 sti/min*2		
Lubrication	Semi-dry		
Feeding type	Screw drive		
Stitch length	0.5 - 12.7 mm		
Hook	Full-rotary double-capacity hook		
Lift / Stroke of intermediate presser	Lifting amount: 20 mm / Stroke: Standard 4 mm		
Variable lower position of the intermediate presser	0 - 9	mm	
Needle	DP x 17 #21 (#19~#21)	DP x 17 #23 (#23~#25)	
Template recogniser	RFID: 6055ZKZ Barcode: 6055ZKW	RFID: 6055ZKZ Barcode: 6055ZKW	
Storage of pattern data in the memory	of pattern data in the memory Max. 999 patterns (5,000,000 sti/pattern		
Program input mode	m input mode USB		
Weight	552Kg (ZKZ)		
Dimensions	1,753mm (W) × 1,410mm (L) × 1,524mm (H)		

- \*1 The X-direction can be extended up to 800 mm.
- Sewing area 800mm(X)×550mm(Y): PS-910HS6055ZK\*/X88032, PS-910AS6055ZKW/X88032 \*2 sti/min is the abbreviation for "stitches per minute"

#### WHEN YOU PLACE ORDERS

Please note when placing orders, that the model name should be written as follows:

		Power sup	ply	Cod
		Single-phase 20	0-220V	K
Feed mechanism Screw drive (ball screw)	Code	Sewing area (X-Y	,	
PS-910	ת ק	60552	ZK	
PS-910 Sewing specifications	Code	_	ZK Code	<u>П</u>
	5	_	4	
Sewing specifications Heavy weight materials	Code	Device	Code Z	Code
Sewing specifications Heavy weight materials (for air bag)	Code	Device without option	Code Z	Ī
