#### WHEN YOU PLACE ORDERS

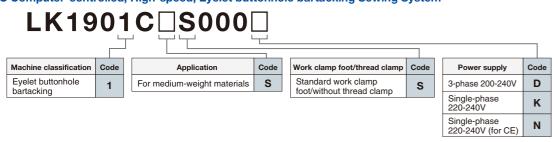

Please note when placing orders, that the model name should be written as follows:

#### Machine head, control box, panel

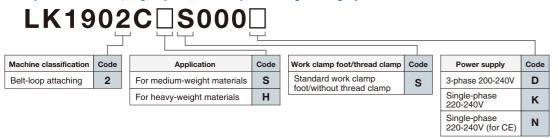

● Computer-controlled, High-speed, Bartacking Sewing System

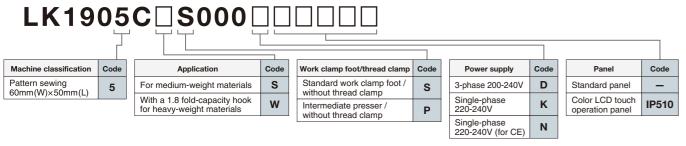

● Computer-controlled, High-speed, Eyelet buttonhole bartacking Sewing System

● Computer-controlled, High-speed, Belt-loop attaching Sewing System

Computer-controlled, High-speed, Pattern Sewing System (Sewing area expansion model)

Products complied with JUKI SUSTAINABLE PRODUCTS Standard (JUKI own standard)

The products are paying attention to environmental impact reduction, better working environment and helping create smart factory.

The power consumption is reduced by 25% or more compared to conventional products.

Registered Organization: JUKI CORPORATION Head Offi The Scope of the Registration: The activities of resear development, design, sales, distribution, and maintenan services of industrial sewing machines, household sewi machines and industrial robots, etc., including sales a

## LK-1900C Series

Computer-controlled, High-speed, Bartacking Sewing System

World's highest class sewing speed of 3,300 sti/min! Established computer-controlled bartacking machine is now further evolved.

Inspire the Knowledge in Sewing Adjustment Epoch-making Sewing Systems in history

Computer-controlled, High-speed, Bartacking Sewing System

LK-1900C Series

Computer-controlled, High-speed, Bartacking Sewing System

# LK-1900C Series

Digital sewing system proposes the production process added with a computerized new value to all the people who engage in production.

#### **Increased productivity**

#### **Higher productivity**

The LK-1900C has achieved the maximum sewing speed of 3,300 sti/min. The new mechanism contributes to increased rigidity of the machine driving section. In addition, greater speed is achieved through the reviewing of the Oiling System.

The LK-1900CW (with a 1.8-fold capacity hook) runs at a speed of 3,000 sti/min.

#### Easier alignment of sewing positions

Patent pending

The "built-in LED marking light" facilitates positioning of bartacking to reduce unnecessary operation for placing the fabric. The irradiation width of the marking light is adjustable.

•Some types of the work clamp foot may hide the irradiated light.

Example of The H type thread guide installed.

#### Standard LCD panel / Control box integrated with the machine head

The control box integrated with the machine head, originally designed by JUKI, is adopted. The number of standard patterns is 100. As many as 999 patterns (500,000 stitches) can be stored in memory. The new upright type operation panel is installed on the side face of the machine head to allow the operator to operate the machine without averting his/her eyes, during sewing, from the bartack being sewn. In addition, the table surface can be used widely. The operation panel can also be installed on the

• If you want to install the operation panel on the table, an optional connecting cable (1.6 m)

Standard LCD panel: To be

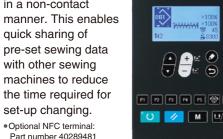

Control box integrated with

Data

#### Two-way data communication function optional for sewing machine data using an NFC terminal

The standard LCD panel is provided as standard with a USB port to facilitate data management between sewing machines and update of software. If you additionally use the optional NFC terminal, bidirectional data communication is enabled with a

commercially-available Android terminal in a non-contact manner. This enables quick sharing of pre-set sewing data with other sewing machines to reduce the time required for

The sewing machine can be paired with equipment which supports NFC (Near Field Communication) only by holding the equipment over the sewing machine NFC terminal optional

Android OS Version 6.0 is recommended to use JUKI Smart APP. (Operation is confirmed with respect to Versions 5.0 and later.) Contact JUKI distributor in your area for how to use the application software.

## Movable eye guard device

The movable eye guard device protects eyes only during sewing. When the sewing machine is at rest, the eye guard automatically goes up to provide a clear view of the needle entry area, thereby allowing the operator to place the fabric smoothly.

• Movable eye guard kit: Part number 40297869

#### 1.8-fold capacity hook type is supported: LK-1900CW

LK-1900C-WS has adopted a 1.8-fold capacity hook to reduce the time required for thread changing by half in comparison with the standard hook. The maximum sewing speed has been significantly increased to 3,000 sti/min to contribute to increased production capacity.

#### Various functions

#### **Excellent workability and operability** (Low-noise and low-vibration

- The direct-drive head (with no belt), which is directly connected to a compact AC servomotor, achieves outstanding. This head helps create a comfortable working environment with reduced vibration and noise
- The arm section of the machine head is fitted with a hand pulley. This allows the operator to visually check the needle

#### Many different sewing patterns

• The machine is provided as standard with 100 different sewing patterns. The machine permits easy changeover of sewing patterns for effortless execution of an inexhaustible range of sewing specifications.

#### Auto-lifter mechanism utilizing a system

- The machine is provided as standard with auto-lifter that uses a stepping-motor system. This helps reduce operator fatigue.
- It is also possible to change over the stroke of the auto-lifter from a onestep stroke to a double-step stroke, which offers easier positioning of a material on the machine. For the double-step stroke, an intermediate stopping height can be established on the operation panel.
- The work clamp foot lift can be set to a maximum of 17 mm. (Standard 14 mm)

#### **Excellent seam quality**

 Needle thread grasping mechanism helps produce consistent knot tying at the beginning of sewing. (This device has been factory-set to "invoking prohibited" status at the time of delivery.) • In the case "T" is selected for the work clamp foot/thread clamp

#### The sewing starting point can be corrected

• The sewing starting point can be moved in the X and/or Y directions. The position of the sewing pattern can be corrected in accordance with the shape of the work clamp foot.

#### Oil stains are eliminated

- Thanks to our advanced dry-head technology, the frame (needle bar and thread take-up) no longer requires lubrication. This prevents the material from being stained with lubricating oil.
- Just a small quantity of clean oil is supplied from the oil tank to the hook.

#### The machine is provided as standard with the active tension (electronic thread tension control mechanism)

- Since the machine is provided with an active tension mechanism, it is able to set a needle thread tension that matches various sewing conditions (such as thread, material and sewing speed) on the operation panel, store the data in memory and reproduce it.
- The needle thread tension can be separated according to stitching type or portion of a seam, such as the beginning part of the seam, in the middle of sewing and end of the seam (fastening stitch).

#### **Improved working environment**

#### Operator's fatigue is reduced

The LED hand light is now provided with color matching function using two colors (white/light bulb color) in addition to the conventional dimming function. Illumination is adjustable in five levels and dimming is in 10 levels to help reduce the eye fatigue of the operator who is engaged in sewing operation for extended hours.

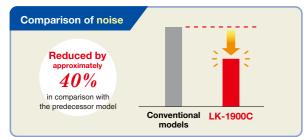

Mixed color

#### Noise are reduced

This machine substantially reduces noise in comparison with the predecessor models to provide the wok environment that takes reduction of the operator's fatique into consideration.

 Reduction of noise of the sewing machine by approximately 40% ..... Stress on the ears is relieved

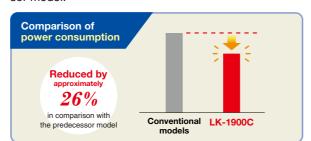

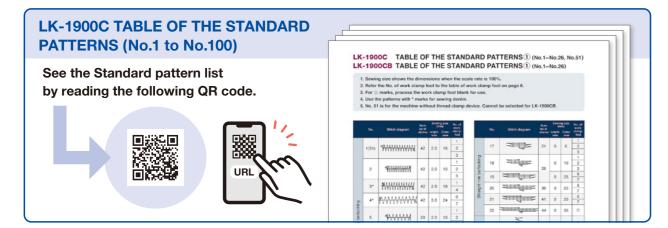

\*Comparison at the sewing speed of 3,200sti/min

#### **Environmental-friendly power saving**

Light bulb color

Aiming at the creation of environment-conscious products, an encoder is mounted on the stepping motor. Thanks to the JUKI's unique control technology. power consumption of this machine is reduced by approximately 26% in comparison with the predecessor model.

The maximum sewing speed of 3,300sti/min and increased thread trimming speed help reduce the total cycle time to achieve increased production capacity. The LK-1900C is a computer-controlled high-speed bartacking machine with excellent seam quality. It is provided as standard with 100 different sewing patterns to support a wide range of stitching.

#### Many different models are prepared according to the type of materials

- The LK-1900C model comes in five different subclass models, such as S type (standard), H type (for heavy-weight materials), F type (for foundation), W type (with a 1.8 fold-capacity hook for heavy-weight materials) and B type (bird's nest preventing / shorter - thread remaining functions), to offer a choice according to any application.
- The needle's penetrating force into the material has been increased. This provides an improved responsiveness to heavy-weight materials for the H type machine.
- The W type has adopted a 1.8 fold-capacity hook, which reduces the frequency of bobbin-thread changing to enable highly efficient

**F type** (Attaching the shoulder straps to brassier)

H, W type (Bartacking crotch of jeans)

#### One touch button switching kit optional Part number: 40297574

It is a double-function enabling kit for converting the bartacking machine to the button sewing machine.

• This table only lists the sections that are different from the LK-1900C.

poc	poomodiono						
1	Max. sewing speed	2,700 sti/min					
2	Lift of the work clamp foot	Max. 11 mm					
3	Number of standard patterns	50 patterns

Button size	Button size						
	Outside diameter that can be adjusted (mm)						
Sewing size (mm)	Υ	0~3.5					
Sewing Size (IIIII)	Х	0~3.5					

Shank buttons cannot be sewn.

Computer-controlled, High-speed, **Eyelet buttonhole bartacking Sewing System** 

LK-1901C

Dedicated bartacking machine for eyelet buttonholes.

#### The machine ensures high-quality bartacks on eyelet buttonholes.

- The machine is provided with a material-drawing mechanism which draws the right and left parallel portions of an eyelet buttonhole near to one another.
- The machine performs bartacking with the right and left parallel portions of the eyelet buttonhole drawn near to one another after the buttonhole is clamped under the work clamp foot, thereby finishing highly durable and well-tensed eyelet
- The material drawing amount can be adjusted to 3mm at maximum.

#### The material drawing mechanism can be switched to ON/OFF.

• The material drawing mechanism can be switched ON/OFF in accordance with the setting of the memory switch.

#### The sewing pattern best suited to the sewing product to be bartacked can be selected by single-key operation.

- Three different sewing patterns are prepared to enable easy switchover of sewing sizes. If the sewing patterns are assigned to the pattern keys on the operation panel, the sewing patterns can be called up or changed with single-key
- The machine sews the most optimally suited bartacks on eyelet buttonholes on the front bodies of garments and straight buttonholes that differ in stitch number and size on jacket lapels, thereby improving the finished quality of sewing

#### Computer-controlled, High-speed, Belt-loop attaching Sewing System

**LK-1902C** 

Dedicated bartacking machine for attaching belt loops.

#### The sewing pattern best suited to the sewing product to be bartacked can be selected by single-key operation.

 The machine is provided as standard with six different linear bartacking patterns. Since the sewing size can be easily changed, the optimal number of stitches and sewing size can be speedily selected according to the belt-loop width. If the normally used patterns are assigned to the patterns keys, a desired pattern can be called up or changed with single-key operation.

■ WORK CLAMP FOOT AND FEED PLATE FOR LK-1902C (for belt-loop attaching)

	Work clamp foot	Feed plate	Number of pattern
Provided as standard LK-1902C-SS LK-1902C-HS	13544465	14143002	17 18
Option For large size	13545660	13545504	19 20 21
Option	13547161	13545801	22
For extra large size	37 41.5	13547005	22

<sup>\*</sup>A finger guard is included in the presser foot.

### Computer-controlled, High-speed, Pattern Sewing System

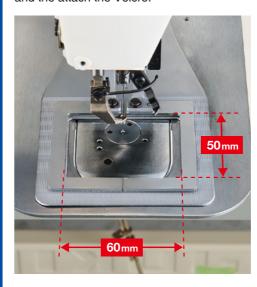

K-1905C/P-510 60mm(W) × 50mm(L)

This machine is a pattern sewing machine with an expanded sewing area of 60mm (W) × 50mm (L). It can be used for a wide range of applications including men's and women's clothing, denim, and knitwear.

#### Sewing area expansion: 60mm (W) × 50mm (L)

It can be used for sewing patterns such as the elastictape connection of the boxer pants, the box sewing of the sleeve spread, and the attach the Velcro.

#### Operation panel provided with programmable functions IP-510 (Selectable)

The IP-510 is the newly-developed operation panel that comes with a high-resolution touch-panel screen. The speed of response to the operation is increased. The operator is able to input/edit data while visually observing the needle entry points.

A file name consisting of 12 alphanumeric characters can be set to a piece of pattern data. As a result, It is possible to manage the sewing pattern using the file name. In addition, since the corrective measure is additionally displayed to the error message, easy resetting of the error is enabled. The operation panel is also provided as standard with a USB port. Data management and software update can be carried out with ease using a USB thumb drive.

#### The memory storage capability of the main body of the sewing machine

Sewing data created with the IP-510 can be stored in the memory of the main body of the sewing machine. The memory storage capacity is 50,000,000 stitches and 999 patterns (max. 50,000 stitches per pattern) at the maximum.

#### **Intermediate presser (Selectable)**

The intermediate presser foot prevents the material from flapping and produces beautiful sewn results, making it suitable for sewing processes that require frequent changes in stitch size and shape.

Intermediate presser

### LIST OF OPTIONAL DEVICES FOR THE LK-1900C

No.	Name	Part number	Features	Supported models
1	Movable eye guard kit	40297869	The device that protects eyes only during sewing. The eye guard automatically goes up while the sewing machine is at rest to facilitate placement of the fabric.	Excluding the LK-1905C
2	NFC terminal	40289481	The terminal for wirelessly sharing setting data of the sewing machine.	All models
3	One touch button switching kit	40297574	The kit for converting specifications of the bartacking machine to those of the button sewing machine.	LK-1900C
4	Panel cable assy L	40297363	A long cable to be used to install the operation panel on the table. (1.6 m for installation on the table)	Excluding the LK-1902C
(5)	Thread breakage detector kit	40298501	The device that detects thread breakage to stop the sewing machine.	All models
6	Pedal for standing work	M85205800A0	Conversion cable (separately available) is necessary to connect to the electrical control box.	All models
7	Pedal switch conversion cable assy for standing work	40304660		All models
8	PK-57 Pedal for standing work	GPK570010B0	Conversion cable (separately available) is necessary to connect to the electrical control box.	All models
9	Pedal switch conversion cable assy for PK-57	40291303	Please order 'arth set: 40298598' separately.	All models
10	Simple work clamp kit	40057279	Conventionally, the front plate has to be removed to change the work clamp. With the new work clamp kit, the work clamp can be changed without removing the plate.	LK-1900C, LK-1905C
11)	IP-510A panel	40296932	Large color LCD touch panel with input function	All models
12	Operation box fixed plate (B) asm.	40035024	Mounting plate for table installation for IP-510A	All models
(13)	Wood screw D=4.1 L=3.2 (2 pieces)	SK3413201SE	Mounting plate screws for IP-510A	All models
(14)	Cable band	EA9500B0100	Cable fixing band for IP-510A	All models
15)	Core	HN004510000	IP-510A panel cable core (for CE)	All models
