### WHEN YOU PLACE ORDERS

Please note when placing orders, that the model name should be written as follows:

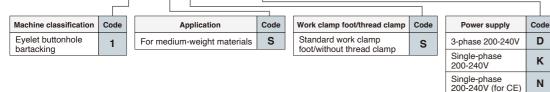

• Computer-controlled, High-speed, Bartacking Sewing System

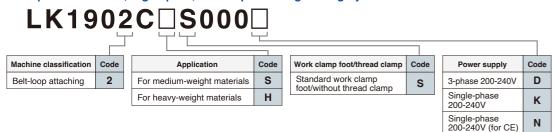

• Computer-controlled, High-speed, Eyelet buttonhole bartacking Sewing System

selected for the work clamp foot/thread clamp

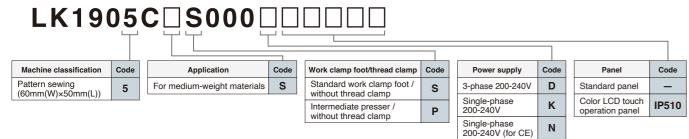

# LK1901C S000

• Computer-controlled, High-speed, Belt-loop attaching Sewing System

#### • Computer-controlled, High-speed, Pattern Sewing System (Sewing area expansion model)

Products complied with JUKI SUSTAINABLE PRODUCTS Standard (JUKI own standard)

The products are paying attention to environmental impact reduction, better working environment and helping create smart factory The power consumption is reduced by 25% or more compared to conventional products.

2-11-1, TSURUMAKI, TAMA-SHI, TOKYO 206-8551, JAPAN PHONE: (81) 42-357-2370 FAX: (81) 42-357-2274 https://www.juki.co.jp/en

• Specifications and appearance are subject to change without prior notice for improvement. • Read the instruction manual before putting the machine into service to ensure safety • QR code is a registered trademark of DENSO WAVE INCORPORATED.

DIGITALLY Smart Solution

## LK-1900C Series Computer-controlled, High-speed, Bartacking Sewing System

World's highest class sewing speed of 3,300 sti/min! Established computer-controlled bartacking machine is now further evolved.

### Inspire the Knowledge in Sewing Adjustment **Epoch-making Sewing Systems in history**

JANUARY, 2025 Printed in Japan(TN)

LK-1900C

#### DIGITALLY Smart Solution

Digital sewing system proposes the production process added with a computerized new value to all the people who engage in production.

## **Increased productivity**

Series

#### Vew Higher productivity

The LK-1900C has achieved the maximum sewing speed of 3,300 sti/min. The new mechanism contributes to increased rigidity of the machine driving section. In addition, greater speed is achieved through the reviewing of the Oiling System.

• The LK-1900CW (with a 1.8-fold capacity hook) runs at a speed of 3,000 sti/min.

### New Easier alignment of sewing positions

The "built-in LED marking light" facilitates positioning of bartacking to reduce unnecessary operation for placing the fabric. The irradiation width of the marking light is adjustable.

• Some types of the work clamp foot may hide the irradiated light.

Patent pending

Example of The H type thread guide installed.

# Standard LCD panel / Control box integrated with the machine head

The control box integrated with the machine head, originally designed by JUKI, is adopted. The number of standard patterns is 100. As many as 999 patterns (500,000 stitches) can be stored in memory. The new upright type operation panel is installed on the side face of the machine head to allow the operator to operate the machine without averting his/her eyes, during sewing, from the bartack being sewn. In addition, the table surface can be used widely. The operation panel can also be installed on the table as before.

Standard LCD panel: To be installed to the machine head

be Control box integrated with lead the machine head

# Two-way data communication function optional for sewing machine data using an NFC terminal

• If you want to install the operation panel on the table, an optional connecting cable (1.6 m)

The standard LCD panel is provided as standard with a USB port to facilitate data management between sewing machines and update of software. If you additionally use the optional NFC terminal, bidirectional data communication is enabled with a

commercially-available Android terminal in a non-contact manner. This enables quick sharing of pre-set sewing data with other sewing machines to reduce the time required for set-up changing. • Optional NFC terminal: Part number 40289481

will be necessary. Part number: 40297363

The movable eye guard device protects eyes only during sewing. When the sewing machine is at rest, the eye guard automatically goes up to provide a clear view of the needle entry area, thereby allowing the operator to place the fabric smoothly. • Movable eye guard kit: Part number 40297869

### Various functions

#### Excellent workability and operability (Low-noise and low-vibration)

- The direct-drive head (with no belt), which is directly connected to a compact AC servomotor, achieves outstanding. This head helps create a comfortable working environment with reduced vibration and noise.
- The arm section of the machine head is fitted with a hand pulley. This allows the operator to visually check the needle entry points.

### Many different sewing patterns

 The machine is provided as standard with 100 different sewing patterns. The machine permits easy changeover of sewing patterns for effortless execution of an inexhaustible range of sewing specifications.

### Auto-lifter mechanism utilizing a system

- The machine is provided as standard with auto-lifter that uses a stepping-motor system. This helps reduce operator fatigue.
- It is also possible to change over the stroke of the auto-lifter from a onestep stroke to a double-step stroke, which offers easier positioning of a material on the machine. For the double-step stroke, an intermediate stopping height can be established on the operation panel.
- The work clamp foot lift can be set to a maximum of 17 mm. (Standard 14 mm)

Android OS Version 6.0 is recommended to use JUKI Smart APP. (Operation is confirmed with respect to Versions 5.0 and later.) Contact JUKI distributor in your area for how to use the application software.

#### 1.8-fold capacity hook type is supported: LK-1900CW

LK-1900C-WS has adopted a 1.8-fold capacity hook to reduce the time required for thread changing by half in comparison with the standard hook. The maximum sewing speed has been significantly increased to 3,000 sti/min to contribute to increased production capacity.

#### **Excellent seam quality**

 Needle thread grasping mechanism helps produce consistent knot tying at the beginning of sewing. (This device has been factory-set to "invoking prohibited" status at the time of delivery.)
 In the case "T" is selected for the work clamp foot/thread clamp

#### The sewing starting point can be corrected

The sewing starting point can be moved in the X and/or Y directions. The position of the sewing pattern can be corrected in accordance with the shape of the work clamp foot.

#### Oil stains are eliminated

- Thanks to our advanced dry-head technology, the frame (needle bar and thread take-up) no longer requires lubrication. This prevents the material from being stained with lubricating oil.
- Just a small quantity of clean oil is supplied from the oil tank to the hook.

# The machine is provided as standard with the active tension (electronic thread tension control mechanism)

- Since the machine is provided with an active tension mechanism, it is able to set a needle thread tension that matches various sewing conditions (such as thread, material and sewing speed) on the operation panel, store the data in memory and reproduce it.
- The needle thread tension can be separated according to stitching type or portion of a seam, such as the beginning part of the seam, in the middle of sewing and end of the seam (fastening stitch).

### Improved working environment

#### Operator's fatigue is reduced

The LED hand light is now provided with color matching function using two colors (white/light bulb color) in addition to the conventional dimming function. Illumination is adjustable in five levels and dimming is in 10 levels to help reduce the eye fatigue of the operator who is engaged in sewing operation for extended hours.

Conventional LK-1900C

# Computer-controlled, High-speed, Bartacking Sewing System **LK-1900C**

The maximum sewing speed of 3,300sti/min and increased thread trimming speed help reduce the total cycle time to achieve increased production capacity. The LK-1900C is a computer-controlled high-speed bartacking machine with excellent seam quality. It is provided as standard with 100 different sewing patterns to support a wide range of stitching.

### Many different models are prepared according to the type of materials

- (for foundation), W type (with a 1.8 fold-capacity hook for heavy-weight materials) and B type (bird's nest preventing / shorter thread remaining functions), to offer a choice according to any application.
- The needle's penetrating force into the material has been increased. This provides an improved responsiveness to heavy-weight materials for the H type machine.
- The W type has adopted a 1.8 fold-capacity hook, which reduces the frequency of bobbin-thread changing to enable highly efficient sewing work.

S type (Bartacking pocket lip of suits)

F type (Attaching the shoulder straps to brassier)

### One touch button switching kit optional Part number: 40297574

It is a double-function enabling kit for converting the bartacking machine to the button sewing machine.

• This table only lists the sections that are different from the LK-1900C.

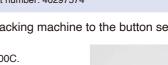

Spec	cifications		Sewing mode			
1	Max. sewing speed	2,700 sti/min	Button size		For small	
	Lift of the work	Mar. 44 mm			button	
2	clamp foot	Max. 11 mm	Outside diameter th		Φ10~Φ20

3	standard patterns	50 patterns	Sewing size (mm)	Υ	0~3.5	
					0~3.5	
			Shank buttons cannot be s	ewn.		

• The LK-1900C model comes in five different subclass models, such as S type (standard), H type (for heavy-weight materials), F type

H, W type (Bartacking crotch of jeans)

The movable eve protection cover, shown in the photo, is optionally available

Thanks to the Bird's nest preventing / shorter-thread remaining functions, manual thread-nipping is no longer required and gives soft and smooth feeling on the bartaking sections where directly contact skin such as brassieres and tank tops.

The sewing machine eliminates so-called "bird's nests" (thread tangling in on the wrong side of the material at the beginning of sewing).

Length of thread remaining on the material at the end of sewing has been reduced to 2 mm or less.\* \*Use #60-80 (TEX22-30) polyester spun thread

Dedicated bartacking machine for eyelet buttonholes. Three different sewing patterns are available to allow the sewing size to be changed with ease. The machine performs bartacking with the right and left parallel portions of the eyelet buttonhole drawn near to one another after the buttonhole is clamped under the work clamp foot, thereby finishing highly durable and well-tensed eyelet buttonholes. The material drawing amount can be adjusted to 3 mm at maximum.

The material drawing mechanism can be switched ON/OFF in accordance with the setting of the memory switch.

## Computer-controlled, High-speed, Belt-loop attaching Sewing System **LK-1902C**

Dedicated bartacking machine for attaching belt loops. The optimum number of stitches and sewing size can be quickly selected in accordance with the belt loop width, and six different straight line tacking patterns are provided as standard. Once you register preferred patterns to the pattern keys, you can call and/or change the target pattern by a simple touch of the relevant pattern key. • Built-in LED marking light for alignment is not installed.

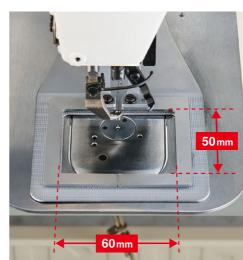

## Computer-controlled, High-speed, Pattern Sewing System

This machine is a pattern sewing machine with an expanded sewing area of  $60mm (W) \times 50mm (L)$ . It can be used for a wide range of applications including men's and women's clothing, denim, and knitwear.

#### Sewing area expansion: 60mm (W) × 50mm (L)

It can be used for sewing patterns such as the elastictape connection of the boxer pants, the box sewing of the sleeve spread, and the attach the Velcro.

A file name consisting of 12 alphanumeric characters can be set to a piece of pattern data. As a result, It is possible to manage the sewing pattern using the file name. In addition, since the corrective measure is additionally displayed to the error message, easy resetting of the error is enabled. The operation panel is also provided as standard with a USB port. Data management and software update can be carried out with ease using a USB thumb drive.

of the main body of the sewing machine Sewing data created with the IP-510 can be stored in the memory of the main body of the sewing machine. The memory storage capacity is 50,000,000 stitches and 999 patterns (max. 50,000 stitches per pattern) at the maximum.

#### Intermediate presser (Selectable)

The intermediate presser foot prevents the material from flapping and produces beautiful sewn results, making it suitable for sewing processes that require frequent changes in stitch size and shape.

#### Operation panel provided with programmable functions IP-510 (Selectable)

The IP-510 is the newly-developed operation panel that comes with a high-resolution touch-panel screen. The speed of response to the operation is increased. The operator is able to input/edit data while visually observing the needle entry points.

## The memory storage capability

Intermediate presser

#### LIST OF OPTIONAL DEVICES FOR THE LK-1900C

No.	Name	Part number	Features	Supported models
1	Movable eye guard kit	40297869	The device that protects eyes only during sewing. The eye guard automatically goes up while the sewing machine is at rest to facilitate placement of the fabric.	Excluding the LK-1905C
2	NFC terminal	40289481	The terminal for wirelessly sharing setting data of the sewing machine.	All models

	Without knurl/without plating	Sewing area 30×40	40021856		
t=1.2	Without knurl/stainless steel*	Sewing area 30×40	40021857		
*Stainless steel t=0.5	With knurl/with plating	Sewing area 30×40	40021858		
	With knurl/without plating	Sewing area 30×40	40021859		
Work clamp foot face plate (asm.)	Face plate for presser blank		14121263		
	With knurl/with plating (right)	Sewing area 20×40	14121701		
Presser blank	With knurl/with plating (left)	Sewing area 20×40	14121800		
	With knurl/with plating (right)	Sewing area 30×40	40021851		
	With knurl/with plating (left)	Sewing area 30×40	40021852		
t=3.2	With knurl/without plating (right)	Sewing area 30×40	40021853		
	With knurl/without plating (left)	Sewing area 30×40	40021854		
Work clamp	With knurl/with plating (right)	With knurl/with plating (right)			
foot blank	With knurl/with plating (left)	40021870			
	A=1.6 B=2.6 With relief slit Standa	ard type	B2426280000		
Needle hole guide	A=1.6 B=2.0 Without relief slit F ty	/pe	D2426282C00		
	A=2.3 B=4.0 Without relief slit H ty	ype and W types	14109607		
ØB ØA	A=2.7 B=3.7 Without relief slit for	extra heavy-weight material	D2426MMCK0		
Finger guard (1)	A=56.5 B=64	13533104			
B	A=59 B=74 For extra-large bartac	king	13548300		
Finger guard (2)	A=66.5 B=43 For lengthwise barta	acking	13573407		
Finger guard (3)	A=21.5 B=35.5 L=58.5 For specia	Ily ordered work clamp	14120000		
Kit for knit material	Kit parts for converting the machin medium-weight materials (S) type		40299251		

### SPECIFICATIONS

	Bartacking machine								
Model name	LK-1900CS	LK-1900CH	LK-1900CF	LK-1900CW	LK-1900CB				
Application	For medium-weight materials	For heavy-weight materials	For foundation	With 1.8 fold-capacity hook for heavy- weight materials	Bird's nest preventing / Shorter-thread remaining functions				
Max. sewing speed		3,300sti/min*		3,000sti/min*	3,200sti/min*				
Sewing area			40mm(W)×30mm(L)						
Stitch length									
Needle bar stroke									
Lift of the work clamp foot		Standard 11mm (by using the reverse-rotation needle-up function 14mm)							
Auto-lifter	Provided as standard (stepping motor type)								
Needle thread tension		Active tension (electronic thread tension control system)							
Needle (at the time of delivery)	DP×5 (#14)	DP×17 (#21)	DP×5 (#11)	DP×17 (#21)	DP×17 (#14)				
Hook	Standard hook 1.8 fold-capacity hook				Standard hook				
Number of stitches that can be stored in memory									
Number of standard patterns		100 p	atterns		50 patterns				
Number of data that can be input			999 patterns						
Enlarging/Reducing facility	acility 20~200% (1% step), Pattern enlargement/reduction can be done by increasing/decreasing the stitch length								
Memory method			Internal memory						
Bobbin thread counter		Provideo	d as standard (up/down	method)					
Marking light		Provi	ded as standard (green	LED)					
Lubrication		Hool	k: minute-quantity lubric	ation					
Lubricating oil		JUKI New De	frix Oil No.2 (equivalent	to ISO VG32)					
Sewing machine motor		550W compac	t AC servomotor (direct	-drive system)					
Power supply / Power consumption		Single-phase 200	-240V/230VA, 3-phase	200 -240V/230VA					
Weight		Machine hea	d (Control box, motor, p	anel) 56.9kg					
Air consumption			_		6 L/cycle				

\* sti/min is the abbreviation for "stitches per minute"

	Eyelet buttonhole bartacking machine	Pattern Sewing machine					
Model name	LK-1901CS	LK-1902CS	LK-1902CH	LK-1905CS			
Application	For medium-weight materials	For medium-weight materials	For heavy-weight materials	For medium-weight materials			
Max. sewing speed		3,000sti/min*		2,700sti/min*			
Sewing area		60mm(W)×50mm(L)					
Stitch length							
Needle bar stroke							
Lift of the work clamp foot	Standard 14mm (by using the reverse-rotation needle-up function 17mm)						
Auto-lifter	Provided as standard (stepping motor type)						
Needle thread tension	ŀ	Active tension (electronic thread tension control mechanism)					
Needle (at the time of delivery)	DP×5 (#14)	DP×17	DP×5 (#14)				
Hook	Standard hook						
Number of stitches that can be stored in memory	Max. 500,000 stitches						
Number of standard patterns	No. 11, 12, 13	No. 17, 18 (19, 20, 21, 22*)	No. 17, 18 (19, 20, 21, 22*) <sup>*This device has been factory-set to "invoking prohibited" status at the time of delivery.</sup>				
Number of data that can be input		999 pa	atterns				
Enlarging/Reducing facility	20~200% (1% step), Pattern enlargement/reduction can be done by increasing/decreasing the stitch length						
Memory method	Internal memory						
Material drawing amount	Max. 3mm		-				
Bobbin thread counter		Provided as standar	d (up/down method)				
Marking light	Provided as standard (green LED)		_				
Lubrication	·	Hook: minute-qu	antity lubrication				
Lubricating oil		JUKI New Defrix Oil No.2	(equivalent to ISO VG32)				
Sewing machine motor		550W compact AC servor	notor (direct-drive system)				
Power supply / Power consumption		Single-phase 200-240V/230V	A, 3-phase 200 -240V/230VA				
Weight	Machine h	nead (Control box, motor, pan	el) 56.9kg	Machine head (Control box, motor, panel) 58.3kg			
Air consumption		-	_
