

Shorter-thread remaining kit

The thread trimming work in the bartacking process can be eliminated.

It can be easily retrofitted and the productivity of the bartacking process increases.

The shorter-thread remaining function can be added to your sewing machine only by replacing with the dedicated throat plate kit. The length of the needle thread remaining on the back side of the material at the end of sewing is 2.5 mm or less on average. It eliminates the need for thread trimming operation and gives soft and smooth feeling on the bartacking sections where directly contact skin such as underwear and other items.

Modified parts on a model basis

Applicable models	Sewing category	Part Number
LK-1900A / 1900AN / 1900B / 1900BN	Standard (S)	40193911
	Heavy-weight materials (H)	40194944
LK-1903A / 1903AN / 1903B / 1903BN	Button sewing	40193911
		40193915

- In the case of a button sewing machine, it is necessary to replace the shorter-thread remaining throat plate kit and the dedicated needle hole guide.
- All applicable models require special software
