

For DDL series

Turret presser bar

Applicable models DDL-9000CF, DDL-9000CS, DDL-8000A, DDL-8700-7, DDL-900C

JUKI

JUKI Smart Solutions

**Ideal for multi-product, small-lot production!
No need for replacement
by the operator using a driver.**

What is the turret presser bar?

A presser bar that allows you to use 3 or 2 types of presser feet without replacement. Rotate it and use the required presser foot.

Also watch the video

Features

1. When sewing multiple processes with only one unit, there is no need to replace the presser foot. You can simply sew by rotating it and selecting the required presser foot.
2. No tools such as a screwdriver are required to replace or adjust the presser foot. The operator can prepare the desired presser foot easily and safely.
3. By attaching it to DDL-9000CF (premium digital), you can instantly switch to the sewing pattern (needle thread tension, presser foot pressure, feed dog height, feed locus, etc.) that matches the type and process of the presser foot to be used. Furthermore, the sewing adjustment time can be reduced.
4. Since the 2-position presser foot holder has a sufficient space between the presser foot, an edge guide can be used.

Usage example of an edge guide

3-position presser foot holder assembly

Recommended process examples

	Process for shirt collar/neckband	Standard presser foot, right-stepped presser foot, left-stepped presser foot
	Process for polo shirt placket	Standard presser foot, right-stepped presser foot, left-stepped presser foot
