LZ-2280N Series LZ-2284C-7

High-speed, 1-needle, Lockstitch, Zigzag Stitching Machine

The sewing machine produces soft seams with consistency with a low tension applied to the thread even when it runs at a high speed.

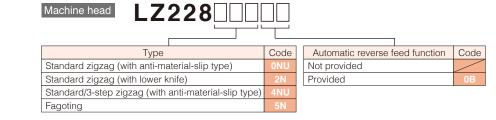

High-speed, 1-needle, Lockstitch, Zigzag Stitching Machine

In 228018 Series

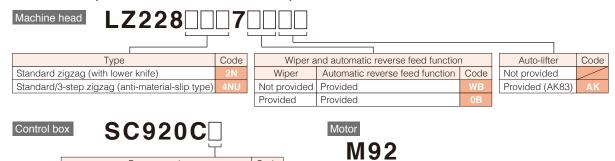

■ WHEN YOU PLACE ORDERS

Please note when placing orders, that the model name should be written as follows

● LZ-2280N series (without automatic thread trimmer)

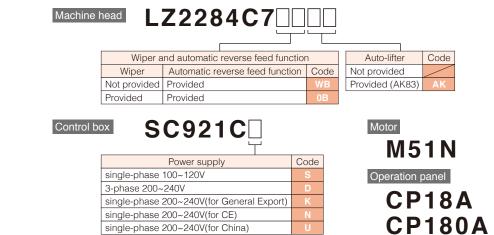

● LZ-2280N-7 series (with automatic thread trimmer)

Power supply Code
single-phase 100~120V S
3-phase 200~240V D
single-phase 200~240V(for General Export) K
single-phase 200~240V(for CE) N
single-phase 200~240V(for China) U

CP18A CP180A

● LZ-2284C-7 (Cylinder-bed type)

Registered Organization: JUNI CORPORATION Head Office The Scope of the Registration: The activities of research, development, design, sales, distribution, and maintenance services of industrial sewing machines, household sewing machines and industrial robots, etc., including sales and maintenance services of data entry systems.

2-11-1, TSURUMAKI, TAMA-SHI, TOKYO 206-8551, JAPAN PHONE: (81) 42-357-2370 FAX: (81) 42-357-2274 https://www.juki.co.jp/en

* Specifications and appearance are subject to change without prior notice for improvement

- *Read the instruction manual before putting the machine into service to ensure safety.
- * This catalogue prints with environment-friendly soyink on recycle paper.
- * Paper from responsible sources FSC™ C001712

DECEMBER, 2020 Printed in Japan(TN)

Highly reliable models in the LZ-2280N series that respond to many different kinds of sewing specifications.

LZ-2282N High-speed, 1-needle, Lockstitch, Standard Zigzag Stitching Machine High-speed, 1-needle, Lockstitch, Standard Zigzag Stitching Machine with Lower Knife (with automatic thread trimmer) LZ-2282N-7 High-speed, Cylinder-bed, 1-needle, Lockstitch, Zigzag Stitching Machine with Automatic Thread Trimmer (with standard/3-step zigzag stitching pattern changeover function) LZ-2284C-7 LZ-2285N

High-speed, 1-needle, Lockstitch, Fagoting Machine

• LZ-2282N / LZ-2282N-7

Productivity is dramatically increased

The machine incorporates a built-in lower knife that trims only the lower material. This allows the machine to simultaneously attach lace to the body of the foundation and trim only the body during processes to attach lace to the bottoms or tops of slips or to the joint seam lines of shorts.

The machine demonstrates consistent trimming performance

The knife is driven by a motor that runs independently from the sewing machine motor. With this feature, the knife can continue to run at a high speeds during trimming even when the speed of the machine is reduced during startup or when sewing curved sections. Furthermore, the knife is placed just beside the needle to provide a constant trimming width even on the curved sections.

This is a cylinder-bed, lockstitch zigzag stitching machine based on the LZ-2284N-7 model. The cylinder-bed more than adequately facilitates the handling of tubular sewing products in circular sewing processes, thereby contributing to increased productivity and upgraded seam quality. This zigzag stitching machine is best suited to the attaching or counter stitching of elastic tape

The pressure provided by the left- and right-hand sections of the fagoting holder can be separately adjusted in order to prevent an uneven material feed

The sewing machine provided with an anti-material-slip function, which promises more beautifully finished seams, is included in three different model lineups.

LZ-2280NU High-speed, 1-needle, Lockstitch, Zigzag Stitching Machine with Anti-material-slip type High-speed, 1-needle, Lockstitch, Zigzag Stitching Machine LZ-2284NU with Anti-material-slip type (with standard/3-step zigzag stitching pattern changeover function) High-speed, 1-needle, Lockstitch, Zigzag Stitching Machine LZ-2284NU-7 with Anti-material-slip type (with standard/3-step zigzag stitching pattern changeover function and automatic thread trimmer)

Uneven feed of the upper and lower cloths is totally eliminated

With its newly developed feed mechanism, the machine prevents "uneven feed of the upper and lower cloths" when sewing girdles and body suits made of slippery, elastic materials.

Simplified mechanism for easy operation

Drop-feed sewing machines are widely said to feed in the lower cloth more quickly than the upper cloth. However, this machine prevents uneven feed of the upper and lower cloths in spite of its a drop-feed mechanism. In appearance, the gauge parts are identical to those of a conventional zigzag stitching machine, and operability is in no way affected by the newly developed feed mechanism.

LZ-2280NU series

■ OPTIONS

Model	Part No.	Description	Feature		
_	225-61559	Automatic reverse feed Kit	This device allows a machine without thread trimmer to perform automatic reverse feed function.		
RF-1	GRF-010000B0	Pedal-operated reverse feed stitching device	The device enables the operator to perform reverse feed stitching using the pedal without using the right hand. (excluding the LZ-2285N)		
M097	MAM-097000A0	Fagotting feller asm. (down-rolled type)	This is the exclusive fagot stitch folder for the LZ-2285N, which is applicable the sewing of lingerie, foundation garments and baby wear. (The fagot stitch folder asm. (up-rolled type): The MAM-09700BA0 has been factory-installed on the machine prior to delive		

Hook gib

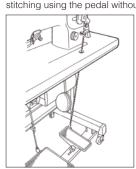

Soft seams can be produced by lowering the bobbin thread tension

400-16408 Hook gib VS

Pedal-operated reverse feed stitching device (RF-1)

The device enables the operator to perform reverse feed stitching using the pedal without using the right hand.

Presser foot connecting components The aforementioned parts are used when a lockstitching type presser foot is installed on the machine. Select a parts set of either the presser-bar changing type or the presser bar

GRF0100000B0 (asm.)

Presser foot connecting components ① B1551-586-000 Presser foot connecting foot
