Official website

"New employee training" and "staff training" —JUKI e-learning is the perfect solution for both!
Learning the essential basics in the sewing industry

Many people are working in sewing-related industries around the world. Yet surprisingly few teaching materials have been developed to provide basic knowledge on sewing machines and sewing technology. Sewing machine operators therefore tend to be self-taught. The basic knowledge and skills acquired through **JUKI e-learning** can be immediately applied to daily work.

Gaining knowledge and experience from the online learning system

The **JUKI e-learning** program has been developed based on accumulated know-how and experience JUKI has acquired in technical training and management training over its long history. With easy-to-understand videos and narrations, training participants can seamlessly learn wide-ranging topics and skills. At the end of each chapter, the participant takes a test to confirm how well he/she understands the content.

Two different types of training are provided: Customers can select the type that suits your condition.

Learning individually!

Individual training type

The individual training type is provided in a standard e-learning format. The training participant takes the individual e-learning courses using Individual PC, tablets or smartphone. The management user can manage his/her progress on the web.

The Individual e-learning training is recommended for the following customers

| Customers who can prepare an internet connection and device for every training participant.	Customers who cannot provide group training because of heavy workloads.	Customers with many employees spread across multiple remote locations.

1 Selecting a course

*Please see the back cover for information on each course.*

Visit the **JUKI e-learning** website on your PC, smartphone, or tablet browser to select an available course.

Learn contents

- [Sewing Operator Training] course
- [Basic Knowledge of Sewing - Lockstitching] course
- [Basic Knowledge of Sewing - Chain Stitch] course

Individuals can select the training courses best suited to their learning needs.

### 2 Taking part in the e-learning courses by watching videos

Each training course is divided into several chapters. (A course takes about three hours, and a chapter takes about 10 to 30 minutes to learn.) Videos with audio commentary make it easy to learn the content.

"Sewing Operator Training" course
Chapter 1 Apparel Industry and Apparel Production

3.3 Descriptions of Parts on Lockstitch Sewing Machines

Training participants can repeat the course whenever they want.

3 Conducting a short test

At the end of each chapter, the training participant takes a test to confirm that he/she has learned the content. A PDF certificate of completion will be issued to every participant who completes all of the chapters and passes all of the tests.

Select the description of each part of the lockstitch automatic thread trimmer from the following group of words.

Issuing a certificate of completion

Certificate

4 Learning management function

The learning progress and learning histories of the training participants are displayed in an easy-to-understand list format. The management user can manage the learning of all of the participants.

Manage scores

Learning together!

Group training type

The group training type is provided in a lecture format using **JUKI e-learning** materials. The group training is conducted with a large number of participants at the same time. To carry out group training, an instructor has to be prepared within the customer's company.

**The group e-learning training is recommended for the following customers**

Customers who cannot provide separate Internet connections and devices for all of their training participants.	Customers who want to provide all of the training in a single session to lower their costs.	When a customer wants to provide training in an unsupported language, the customer's instructor will translate the e-learning materials to be used for the training.

1 Downloading and printing the materials

First, an instructor has to be prepared within the company. Before conducting the group training, the instructor visits the **JUKI e-learning** website to download and print the instructional materials.

Teaching materials for instructor

- Preparation materials
- Schedule e
- Chapter1 Confirmation Test Commentary
2 Conducting the training with videos

Training participants gather together in one place. The instructor uses videos and instructional materials to conduct the training. To help the instructors, the **JUKI e-learning** website provides instructions on how to proceed through the training from the opening remarks to the completion of the tests. Background information, suggestions, and advice are also provided. The **JUKI e-learning** website also offers wide-ranging materials to support learning by the instructors themselves. The instructor training can be carried out at the same time.

The instructors and participants can also discuss the training content and exchange ideas in other ways.

3 Conducting a short test

The training participant takes a test to confirm to using pre-printed confirmation test forms that he/she has learned the content. The instructor can give feedback to the participants on the spot using the test answers and explanations provided by JUKI. A certificate of completion can be printed and distributed to the participants after the course.

Select the description of each part of the lockstitch automatic thread trimmer from the following group of words.
