HOW TO USE THE INSTRUCTION MANUAL FOR MF-7500D/7900D

Only the exclusive portions of MF-7500D/7900D are described in this Instruction Manual. For the items (Caution) other than those, refer to the Instruction Manual for MF-7500 or MF-7900.

I .SPECIFICATIONS

Semi-dry head, high-speed, flat-bed coverstitch machine	Semi-dry head, high-speed, cylinder-bed coverstitch machine						
MF-7500D series	MF-7900D series						
ISO standard 406, 407, 602, and 605							
Hemming and covering for knits and general knitted fabrics							
Max. 5,000 sti/min (during intermittent operation)							
Factory-set sewing speed at the time of shipment. 4,000 sti/min (during intermittent operation)							
3-needle 4.8mm, 5.6 mm and 6.4 mm	3-needle 5.6 mm and 6.4 mm						
2-needle 3.2 mm and 4.0 mm	2-needle 3.2 mm, 4.0 mm and 4.8 mm						
	1:0.9 to 1:1.8 (stitch length : less than 2.5 mm)						
1 : 0.7 to 1 : 2 (stitch length : less than 2.5 mm) Micro-differential feed adjustment mechanism is	(1:0.6 to 1:1.1, when the differential link hinge screw is changed)						
provided. (Micro-adjustment)	Micro-differential feed adjustment mechanism is						
	provided. (Micro-adjustment)						
1.2 mm to 3.6 mm (can be adjusted up to 4.4 mm)	0.9 mm to 3.6 mm (can be adjusted up to 4.5 mm)						
UY128GAS #9S to #12S (standard #10S)							
31mm (or 33 mm when changing over the eccentric pin)							
(Height) 451 x (Width) 515 x (Length) 263	(Height) 450 x (Width) 468 x (Length) 264						
46 kg	42 kg						
8 mm (needle gauge : 5.6 mm without top covering), and 5 mm (with top covering)							
Micro-lifter mechanism is provided.							
Main feed dial type stitch pitch adjustment method							
Differential feed lever adjustment method	micro-adjustment mechanism is provided.)						
Spherical rod drive method							
Forced lubrication method by gear pump							
JUKI GENUINE OIL 18							
Oil gauge lower line : 600 cc to upper line : 900 cc							
Semi-submerged type	Top mount type, Semi-submerged type						
- Equivalent continuous emission sound	- Equivalent continuous emission sound pressure						
pressure level (LpA) at the workstation :	level (LpA) at the workstation :						
A-weighted value of 74.0 dB; (Includes $K_{PA} =$	A-weighted value of 76.5 dB; (Includes $K_{PA} = 2.5$						
2.5 dB); according to ISO 10821- C.6.2 -ISO 11204 GR2 at 4,000 sti/min.	dB); according to ISO 10821- C.6.2 -ISO 11204 GR2 at 4.000 sti/min.						
	MF-7500D series ISO standard 406, Hemming and covering for kr Max. 5,000 sti/min (durin Factory-set sewing speed at the time of shipmond 3-needle 4.8mm, 5.6 mm and 6.4 mm 2-needle 3.2 mm and 4.0 mm 1 : 0.7 to 1 : 2 (stitch length : less than 2.5 mm) Micro-differential feed adjustment mechanism is provided. (Micro-adjustment) 1.2 mm to 3.6 mm (can be adjusted up to 4.4 mm) UY128GAS #9S to # 31mm (or 33 mm when cha (Height) 451 x (Width) 515 x (Length) 263 46 kg 8 mm (needle gauge : 5.6 mm without to Micro-lifter mecha Main feed dial type stitc Differential feed lever adjustment method Spherical rod Forced lubrication m JUKI GENU Oil gauge lower line : 600 Semi-submerged type - Equivalent continuous emission sound pressure level (L _p A) at the workstation : A-weighted value of 74.0 dB; (Includes K _p A = 2.5 dB); according to ISO 10821- C.6.2 -ISO						

II.SELECTING THE MOTOR PULLEY AND THE BELT

Motor pulley and belt

	MF-7500D			MF-7900D				
Sewing speed (sti/min)	50	Hz	60Hz		50Hz		60Hz	
	Pulley size	Belt size						
3,500	ø 80	M-34	ø 65	M-33	ø 80	M-38	ø 65	M-37
4,000	ø 90	M-35	ø 75	M-34	ø 90	M-38	ø 75	M-37
4,500	ø 100	M-35	ø 85	M-35	ø 100	M-39	ø 85	M-38
5,000	ø 115	M-36	ø 95	M-35	ø 115	M-40	ø 95	M-39

* The table shows the numbers when a 3-phase 2-pole 400 W clutch motor (1 / 2 HP) is used.

The commercially-available motor pulley near to the counted value is designated since the outside diameter of the commercially-available motor pulley counts by 5 mm.

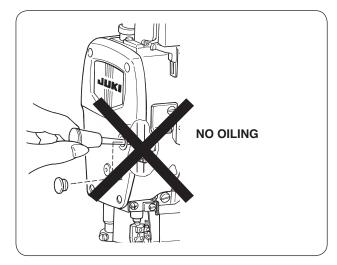

Use a motor pulley which is adaptable to this sewing machine. The sewing speed exceeds the max. sewing speed of this sewing machine and machine trouble will be caused unless a motor pulley which is adaptable to this sewing machine is used. _ __ __ __

II.OILING

The mechanisms inside the frame such as the needle bar, presser lift and spreader components are lubricated with grease. Never add oil inside the frame.

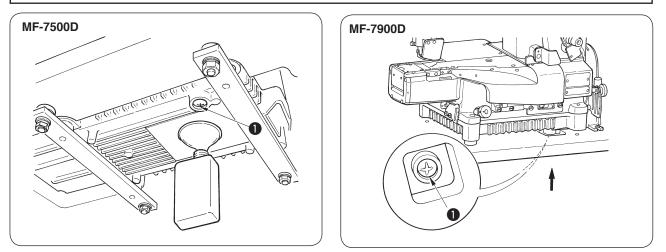

If inside of the frame is oiled, the grease will be expelled, resulting in mechanical failure.

IV.REPLACING THE LUBRICATING OIL

WARNING :

To protect against possible personal injury due to abrupt start of the machine, be sure to start the following work after turning the power off and ascertaining that the motor is at rest.

In case of the new sewing machine, replace the lubricating oil (JUKI GENUINE OIL 18) with new one after using it for approximately one month. Then replace the lubricating oil every six months.

- 1) Set a container to receive the lubricating oil under drain screw ().
- 2) Remove drain screw (). The lubrication oil is drained.
- 3) After the drain, wipe out the oil and attach the drain screw ().
